

# Transition Planning Guide

### **ASSISTING INDIVIDUALS WITH**

disabilities transition from facilities to the community requires careful planning, coordination and communication. The following are considerations that the Money Follows the Person (MFP) team have found to be critical in assuring success. This list is not meant to be all inclusive but is based on MFP experience with transitioning. It is hoped that the questions and considerations listed will stimulate other questions and considerations. It is essential that each transition be tailored to the individual and his/her needs, recognizing one size does not fit all. The questions presented in this guide are directed to the individual transitioning while understanding it may take a support team to assist with the transition. Some questions may need to be answered by his/ her support team on behalf of the individual. Please note that a funding source or a natural support should be identified for all determined needs.
