

## HIV and HCV Rapid Testing Implementation Resources UPDATED: October 04, 2021

### Bloodborne Pathogens Training:

Individuals who will be conducting testing who have not otherwise been trained in proper handling of Bloodborne pathogens should obtain training in this area. For agencies that do not have access to a standard training the following web-based module is cost-effective and sufficient:

<https://courseforbbp.com/>

### Rapid Testing Overview:

The following presentations were pre-recorded to provide background and context on the implementation of testing services.

#### TOPIC

Rapid HIV and HCV Testing  
STD Testing  
Third-Party Billing
