

Service Event Data Set

A Service Event record represents a specific treatment encounter for a client with a substance use, problem gambling, or other disorder, in a provider site as part of their treatment program.

Service Event records must be submitted for all services provided to individuals in Iowa by licensed substance use disorder and problem gambling treatment providers. Provider Treatment Episode information must already exist in the IBHRS before Service Event records can be submitted.

Provider

IBHRS will default to your Provider Agency. If it does not, you can search for your Provider Agency in the Data Entry Screens.

Provider Treatment Episode

Within the IBHRS Data Entry Screens you will be required to search for the Treatment Episode associated with each Service Event.

Service Event Procedure Modifier

A Service Event Procedure Modifier helps further describe a Service Event record's Procedure Code without changing its definition. Service Event records can be submitted with zero, one, or many Service Event Procedure Modifier records. IPN Providers are the only Provider Agencies authorized to use Procedure Modifiers.

Modifier

Primary Medical Care

- Prenatal
- Postpartum
- Pediatric
- Child Immunization

Child Therapeutic Intervention

- Child Development Assessments
- Sexual/Physical Abuse/Neglect

Person

- Patient
