Group 2: Providers Transitioning from I-SMART Reporting to Reporting via IBHRS XML Data Uploads

- **A discharge will need to be completed** for every open case/episode in I-SMART (as of the cut-over date of 6/30/21) using the last date of service before the cut-over date as the Discharge Date and Last Contact Date. Upon completion of the Discharge, close the Episode (Intake screen).
  - **Discharge Reason** = Other (When discharging, use the reason "Other")

- **An IBHRS Client dataset** for each client discharged from I-SMART will need to be created within the Provider Agency Electronic Health Record (EHR) and reported via XML File Upload on/after 8/9/21.

Group 2: Providers Transitioning from I-SMART Reporting to Reporting via IBHRS XML Data Uploads

- **An Admission** will be created for each client discharged from I-SMART within the Provider Agency EHR and reported via XML File Upload.
  - **Admission Date** = date client returns for service (and an encounter is to be reported for this date) which is on/after 7/1/21
  - **Care Status** = Admission

Group 2: Providers Transitioning from I-SMART Reporting to Reporting via IBHRS XML Data Uploads

Notes:

- For new clients that are seen for the first time on/after the cut-over date, the provider will submit IBHRS Client, Treatment Episode and Service Event datasets to IBHRS through the XML File Upload process.

- Any I-SMART user who had "Clinical (Full Access)" will no longer have those same features within IBHRS (e.g., Treatment Plan, Groups, etc.). These users will have **read only access** to the historical information for their SUD/PG episodes within IBHRS. Starting 8/9/21, only the minimum Integrated Treatment (SUD/PG) activity data that occurs on/after 7/1/2021 is to be reported via IBHRS XML Data Uploads.
