Tx Episode Questions

Question: When a client is added to our system they can be added to multiple programs. Is the Treatment Episode 1 to 1 for a client, 1 to 1 while active, or can there be many Treatment Episodes actively associated with a single client? If there are multiple, what scenario would that apply to?

Tx Episode Question

Answer: There should only be one active Treatment Episode per client, per provider. The client can have many active Care Statuses within a Treatment Episode (SUD and Gambling) – those may or may not align with a program.

If the client changes Provider Site/Facility or Level of Care then a Transfer Care Status must be created.

If the client is being treated for both Gambling and SUD and changes facilities, two Transfer Care Statuses would need to be created, one for each Program Area.
