

## Society for Infectious Disease Pharmacists (SIDP): Quality Improvement (QI) Projects Overview

August 13, 2024

1

### Housekeeping

- + Who's in the room today? (Name, facility, role)
- + Your line has been muted upon entry to eliminate any background noise during today's presentation.
  - A reminder that if you have dialed in, please do not place the call on hold as we may hear your "hold" music.
- + We encourage questions and open discussion.
- + Please utilize the Chat box to type in your questions or comments.
- + This event is being recorded.

2

# Agenda

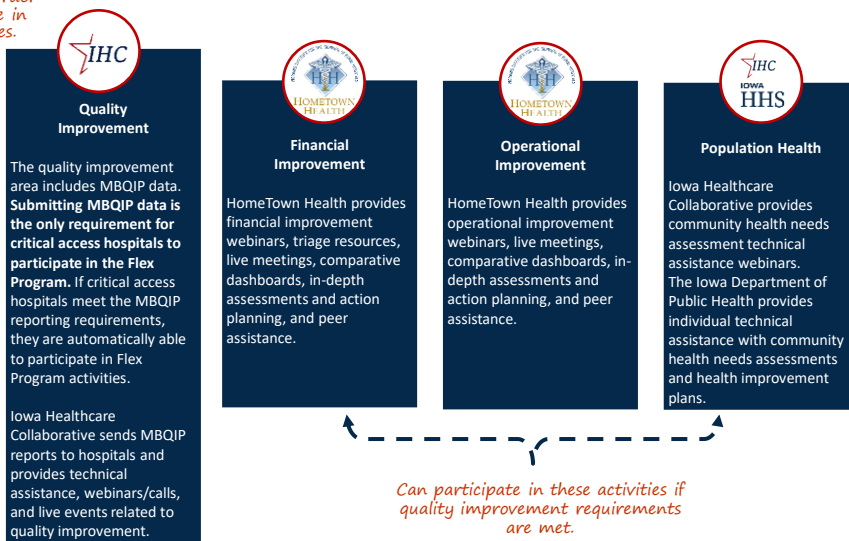

- + Society of Infectious Diseases Pharmacists (SIDP) Antimicrobial Stewardship Certificate Training Program Overview
- + Quality Improvement Project Presentations
- + Q&A

3

# Flex Program Areas

*Required in order to participate in other activities.*

*Can participate in these activities if quality improvement requirements are met.*

4

# Certificate Overview

**Part 1:**  
Core Content  
12 CE hours

- **Goal:** provide foundational knowledge relevant for antibiotic stewardship
- Self-paced, asynchronous, on-demand learning
- Speakers - proven clinicians/educators with national name recognition within ID

**Part 2\*:**  
Application  
Minimum 4.25h required

- **Goal:** expand general stewardship principles to acute care and outpatient settings
- Self-paced, asynchronous, on-demand learning
- Speakers – clinical with expertise in specific settings

**Part 3:**  
QI module – 1 CE h  
Project - 10 CE hours

- **Goal:** apply knowledge gained in Parts 1, 2, & 3 module (required for ACPE certificate)
- Live office hours (optional) with volunteers from SIDP Stewardship Committee

Antimicrobial Stewardship  
Certificate Program

\*8.25h available

[SIDP Website \(Link\)](#)

5

5

## Presenting

**Jordan Wagner, PharmD**  
Director of Pharmacy  
Van Diest Medical Center

**Katie Koehn, RPh, PharmD, BCPS**  
Pharmacist/Rural Pharmacy Coordinator  
Mercy One Dubuque Medical Center

**Emily Hummel, PharmD, BCPS**  
Staff Pharmacist  
Cherokee Regional Medical Center

6

---

# SIDP QI Project Overview

---

JORDAN WAGNER, PHARM.D

7

---

## Hospital Overview

---

- Van Diest Medical Center
  - Hamilton County Public Hospital
  - Critical Access Hospital
- Location: Webster City, Iowa
- Size: 25 beds

8

## Antimicrobial Stewardship Program Overview

- Antibiotic Stewardship Program Leader: Jordan Wagner, PharmD
- Members:
  - Owner – Department of Pharmacy
  - Executive Sponsor – Chief Nursing Officer (CNO)
  - Provider Champion – Medical Doctor (MD)
  - Director of Quality – Registered Nurse (RN)
  - Infection Prevention – RN
  - MedSurg Manager – RN
  - Emergency Department (ED) Manager – RN
  - Surgery Manager – RN
  - Clinic Managers – RNs
  - Ad Hoc – Nursing leadership, Informatics, Laboratory
- Support for our program:
  - Department of Nursing: CNO
  - Medical Staff: Chief of Staff
  - Administration: Chief Executive Officer (CEO)
  - Van Diest Medical Center Board of Trustees

9

## Project Overview

- **Retrospective review of identified target and intervention**
  - De-escalation/streamlining
- **Problem Identified:**
  - High Broad Spectrum Antibiotic Use
    - Need more timely narrowing of antibiotics
    - Susceptibilities
- **Target:**
  - Decreasing broad spectrum antibiotic use
    - Narrowing antibiotics
    - Look at susceptibilities
  - Initially looking for a 20% decrease in broad spectrum antibiotic use
    - Broad-spectrum antibiotic use days of therapy / total days of therapy
- **Measurement:**
  - Evaluate initial antibiotics for each patient on MedSurg floor
  - Look for susceptibility results
  - Initiate step-down therapy
- **Interventions:**
  - Completed susceptibility reports sent to provider and stewardship leader
  - Education of 48 – hour antibiotic time-out alert
- **Involvement:**
  - MedSurg Department
  - Nursing staff
  - Providers
  - Antibiotic Stewardship Team
  - Pharmacists
  - Laboratory
  - Information Technology (IT)

10

## Interventions

---

- **48-hour antibiotic time-out alert**
  - Electronic Medical Record (EMR) driven
  - Little Provider utilization
  - Education at Medical Staff meeting
    - Consisting of: Reason for alert, importance, interaction, intervention
- **Susceptibility Reports**
  - System generated
  - Viewed in timely fashion?
  - Awareness of availability
  - Antibiogram

## Lessons Learned

---

- **Barriers**
  - Data collection
    - Many reports
    - Not one report to collect required information
  - De-escalating Antibiotics
    - Expertise
    - Not a “one size fits all” list for broad vs. narrow spectrum
  - Time
    - Compiling reports
    - Antibiotic regimen for treatments for each patient
- **Overcome**
  - Data collection
    - Spreadsheet of required information
    - Create own report
  - De-escalating Antibiotics
    - Spreadsheet of what is being treated with break down of broad vs. narrow spectrum antibiotics with duration
    - S<sup>3</sup> App – Simplified Spectrum Score
  - Time
    - Using spreadsheet of required information in real time

## Project Outcomes

---

- **Measures of Success**

- This project is now one of our department's quality plans
- Decrease in broad spectrum antibiotic use

- **Plans for Sustainment**

- Quality Plan
- Reported out to several committees

## SIDP Program Experience and Feedback

---

- Self-paced
- Knowledge Checks
- Quizzes
- Discussion Boards
- Office Hours
- Understanding beyond disease states and treatments

## Improving Compliance with Short-Course Antibiotic Recommendations

### An Antimicrobial Stewardship (AMS) Quality Improvement Project

Katie Koehn, PharmD, BCPS

[Katherine.Koehn@mercyhealth.com](mailto:Katherine.Koehn@mercyhealth.com)

15

16

## MercyOne Elkader Medical Center

### The Hospital

11- Bed Critical Access Hospital

Located in Elkader, Iowa population 1,200

### The Providers

Stable Hospitalist staffing Monday-Friday

Stable Locum-tenens staffing weekends and Paid Time Off (PTO) coverage

### The Pharmacy

Contracted Pharmacist services through MercyOne Dubuque Medical Center

Onsite coverage Monday, Wednesday, Friday

Remote coverage by Dubuque pharmacists all other times

16

## Antimicrobial Stewardship already in place

Pharmacist participation in multi-disciplinary review (MDR) meetings when on site

Renal dosing on all antibiotics, Vancomycin dosing services, review of Culture and Sensitivity (C&S) reports when on site

Monthly AMS education articles to nursing staff

Manual Data tabulation of antimicrobial use

Monthly report to med staff showing Days of Therapy (DOT)/1000 Days At-Risk (DAR) for the month and fiscal year to date (FYTD), describing all AMS activities performed by pharmacy

17

## Identifying a project area

Initial plan – Trinity Health Asymptomatic Bacteriuria (ASB) initiative

System-wide initiative to reduce treatment of ASB

Planned to implement Trinity's initiative at MercyOne Elkader

Epic TogetherCare integral to Trinity initiative

Change Healthcare cyberattack in February 2024 delayed TogetherCare go-live until June 2025

18

18

## Identifying a project area

### Plan B – Short course antibiotic recommendations

Topic reviewed in December monthly meeting of Iowa Department of Health and Human Services Critical Access Hospital Antibiotic Stewardship Cohort

Educational session at 2024 Iowa Antimicrobial Stewardship Summit

No formal duration monitoring in place at MercyOne Elkader

19

## Putting it together

Goal: Improve compliance with short-course antibiotic best practice recommendations from the beginning of FY25 (7/1/24) to the end of FY25 (6/30/2025)

20

## Selection of criteria and threshold

### Criteria

American College of Physicians Best Practice recommendations (select indications only)

Community-Acquired pneumonia: < or = 5 days

Uncomplicated UTI: 3-5 days

Uncomplicated Pyelonephritis: 5-7days FQ or 14days Bactrim

Nonpurulent Cellulitis: 5-6 days

### Threshold

Goal: Improve compliance, meaning only intend to monitor if compliance (yes or no data point) goes up or down.

Baseline compliance of 66.7% established with June 2024 data

Quality goal set for 90% compliance by the end of FY25

## Interventions

### Step 1

Educate medical staff

- Email educational materials (July)
- Medical Staff Meeting (August)
- Ongoing ad-hoc education at MDR meetings

### Step 2

Ongoing pharmacist interventions

- MDR meeting participation
- Review all antibiotic orders for duration
- Recommend addition of stop dates whenever possible

# Data collection tool

A simple spreadsheet

Data Collection FY25 (July 2024 - June 2025)					
Target Durations:	CAP	Community acquired pneumonia		5 days	
	UC	Uncomplicated Cystitis		3d Bactrim or FQ, 5d B-lactam or Nitrofurantoin	
	UP	Uncomplicated Pyelonephritis		5-7d FQ or 14d Bactrim	
	NC	Nonpurulent cellulitis		5-6d	
July 2024					
Patient Number	Diagnosis	Short-course compatible (Y/N)	Days of therapy	Compliant (Y/N)	% Compliant
1					
2					
3					
4					
5					
6					
7					
Totals		0		0	#DIV/0!

## FY25 QAPI Department Report

**Department:** Pharmacy

**Quality Indicator(s):** Establish baseline compliance with recommendations for short-course antibiotic therapy in Community-acquired pneumonia, uncomplicated UTI, uncomplicated pyelonephritis, nonpurulent cellulitis and increase compliance to > 90% by the end of FY 25, as determined by monthly audit.

# The FY25 QAPI report

Following MercyOne Elkader's standardized format

**Quality Improvement Initiatives:**

- July: Baseline compliance from June established at 66.7%. Education emailed to providers with short-course guidelines, focus on CAP, uncomplicated UTI, uncomplicated pyelonephritis, nonpurulent cellulitis. Pharmacist interventions at multidisciplinary review (MDR) meetings initiated.
- August: In-person education with providers at Med Staff meeting. Pharmacist interventions at MDR meetings continue.
- September:
- October:
- November:
- December:
- January:
- February:
- March:
- April:
- May:
- June:

## My Team

- **Pharmacy and Therapeutics (P&T) Committee**
- **Med Staff**
- **MercyOne Dubuque AMS team**
- **MercyOne Elkader Quality Assurance and Performance Improvement (QAPI) Coordinator**

### P&T

- Discussed project and approved its implementation.
- Email from my P&T co-chair utilized in AMS QI project submission to SIDP AMS Certification Course

### Med Staff

- Support verbalized at Med staff meetings
- Culture of multi-disciplinary practice receptive to pharmacist intervention

### MercyOne Dubuque AMS team

- Committee chair consulted with me for my AMS QI project and served as my Supervisor for submission to SIDP AMS Certification Course

### Mercy One Elkader QAPI Coordinator

- Developed QAPI report templates
- Review of QAPI SMART goals as written in QAPI reports

## Overcoming Barriers

### The Challenges

Technology – EMR has rudimentary AMS reporting capability

System – On-site staffing 2-3 days per week limits direct contact with providers

Personal – Initial implementation of project planned with May 8<sup>th</sup> P&T; May 20<sup>th</sup> Med staff meeting was delayed due to a family emergency on May 4.

### The Solutions

Technology – Optimize use of patient reporting capability to help identify charts to review, manual tabulation and tracking DOT already in place

System – Ongoing discussion with providers and nursing to keep duration part of team discussions, regardless of pharmacist presence

Personal – Delayed implementation of project until July 1, to coincide with the start of FY25 QAPI cycle

## Moving forward

Next steps will be dependent on FY25 outcome results

Plan to continue pharmacist focus on antibiotic duration at MDR meeting

Include duration in monthly nurse education at least twice a year

Sustainability is an ongoing challenge with MercyOne Elkader's pharmacist staffing model

27

## SIDP QI Project: Intravenous (IV) to Oral administration (PO) Conversion

Emily Hummel, PharmD, BCPS  
August 2024

28

## Cherokee Regional Medical Center

- 25 bed critical access hospital
- Inpatient, ER, surgery, and obstetrics
- Infusion center (including chemotherapy)
- Cherokee Regional Clinics: Cherokee, Aurelia and Marcus
- Fitness Center
- 2 full-time equivalent (FTE) pharmacist coverage

29

## CRMC's Stewardship Committee

- Well rounded team
  - Pharmacy, two physicians, lab, infection control, nursing, IT, administration, quality, ER
- Quarterly meetings
- Great engagement and buy-in
- Goals set annually
- Recently improved our data and tracking

30

## SIDP QI Project Overview

- Pharmacist led IV to PO antibiotic conversion program
  - No previous process
  - Area of interest for Antibiotic Stewardship committee
  - Goal: Educate staff and begin making recommendations
- Met with all inpatient providers first
- Pharmacist handout created for quick reference

31

## Pharmacist Tool

**IV to PO CONVERSION <sup>Rx</sup>**

**Medications**

- Ciprofloxacin IV 400 mg q2h → 500 mg PO q2h \*
- Levofloxacin IV 500 mg q24h → 500 mg PO q24h
- Metronidazole IV 500 mg q8h → 500 mg PO q8h
- Clindamycin IV 600 mg q8h → 300-450mg PO q6h
- Azithromycin IV 500 mg q24h → 500 mg PO q 24h \*\*

**Exclusion**

- Day 1 of antibiotics
- Severe nausea or vomiting
- unable to swallow
- GI obstruction, malabsorption, active GI bleeding, paralytic ileus or severe diarrhea
- unresponsive to previous oral therapy
- Severe mouth sores
- Meningitis, endocarditis, prosthetic infection, osteomyelitis, sepsis, severe cellulitis, bronchiectasis, pneumonia, with ABCs, radiologically drained abscess
- hypotension or shock
- immunocompromised

**Inclusion**

- Eating meals or receiving enteral nutrition
- Receiving other scheduled oral medications
- Signs and symptoms of infection resolved or improving (WBC decreasing, improving chest x-ray, temp <101°F for at least 24 hours, respiratory rate <20 br/min)
- Functional at least 2 days of enteral fluids or 10% enteral nutrition

**Notes**

- Separate Rx's from vitamins, antifolates, iron and magnesium by 4 hours
- \*Ciprofloxacin - avoid suspension via feeding tube (IV and PO tubes okay)
- \*\*Azithromycin - oral tablet bioavailability slightly lower (c. 66-93%) but conversion still appropriate if patient meets criteria

[Access here](#) (Link)

32

## Provider Education

- Articles with information on IV to PO conversion
- Copy of our pharmacist tool
- Explanation of our goal
- Discussion of any of their concerns

33

## Barriers

- Time constraints
  - Pharmacists take care of many clinical areas
  - Rounds only Tuesday/Friday
- Provider habits/trust of oral medications
- Lower staff during much of initial implementation
- Insurance coverage concerns
  - IV medications are one of many inpatient qualifications

34

## Outcomes

- Very little data at this time – some accepted, some declined
- Often patients were discharging when ready to switch to PO
- Will continue to track pharmacist recommendations as acceptance rate (manual documentation)
- Will look at total doses of all antibiotics (already being collected)
  - Will trend IV and PO total numbers

35

## Future Plans

- Our site went live with Buggy in EPIC in July
- IV to PO recommendations may be suggested for us
- Documentation may change with Buggy implantation

36

## Questions

## Upcoming Events

- + **How to Leverage Medicare Beneficiary Quality Improvement Program (MBQIP) Data for Improvements: Social Drivers of Health (SDOH) and Health Equity**
  - August 14, 2024, from 1:00-2:00 PM (CT)
  - Free [Registration](#) (Link)
  
- + **SIDP QI Projects Overview: Session 3**
  - August 20, 2024, from 1:00-2:00PM (CT)
