## **Notice Codes**

Notice codes are listed below in alphabetical order by topic. Within groups, reasons are listed in numerical order. See [Reference Chart](#) at the end of the notice table for an index of the notice codes in numerical order with the page number of the manual where they are found.

**NOTE:** Codes for managed health care services also are described in [14-C](#).

The first column indicates the action for which the notice is used.

The codes listed in the second column have three designations:

- Codes with no parentheses must **either** be worker-entered on the system to generate messages or generated by systems other than ABC (such as PROMISE JOBS).
- Codes with double parentheses are **sometimes** worker-entered on the system to generate messages. ABC generates the messages at other times without the entry of these codes.
- Codes with single parentheses are **never** worker-entered on the system to generate messages.

The second column also indicates the program to which the notice message, manual reference, and rule reference correspond. FMAP-related medical programs are usually included in the designation “MED.” If a program is not listed in this column for a case reason message or a person reason message, that notice reason **cannot** be used for that program.

The third column lists the notice message and the manual reference and state rule (Iowa Administrative Code) or federal regulation (CFR) reference, by program. A Spanish translation of the message is given, if available. Note that many notices go over one page. Be sure to get all the relevant language.

The fourth column lists the system fields in which the notice code is accepted.

## Action Codes

### Facility and Waiver Codes

Action codes are used to create and update facility and waiver payment records in the subsystems. The subsystems also use the codes to determine which data are sent to the peer review organization (PRO) for level of care determination and review.

ACTION	CODE	EXPLANATION OF CODE
Positive	070	System-generated for the original approval to each level of care.
	071	System-generated for subsequent approvals.
		<ul style="list-style-type: none"> <li>▪ Use for transfer from one facility to another at the same level of care.</li> <li>▪ Use in ICF/ID cases when a recipient returns from a home visit of over 90 days or for any transfer into a community-based ICF/ID from another ICF/ID.</li> </ul>
	072	Use to correct the facility or waiver positive date <u>only if</u> the last action was approval. This code does not change the vendor number of the payment status of the action previously entered.
	073	Use to enter a facility vendor number that was omitted or entered incorrectly. (This code does not change the payment status or the effective date of the action previously entered.)
	074	Use to correct client participation when the facility or waiver positive date entered is the same as the one on the screen. Use to correct client participation previously entered in error or which has changed, for the same month, since the entry on file. (Enter both first-month and ongoing amounts and code.)
075	Use to change client participation when the facility or waiver positive date entered is later than the one on the screen. (Enter both first-month and ongoing amounts and code.)	

ACTION	CODE	EXPLANATION OF CODE
Positive (Cont.)	076	Use to change the aid type when the basis of eligibility changes but the recipient stays at the same level of care.  For residential care facility cases only, use to add or change information on the address or on the guardian or conservator.
	077	Use to change a facility vendor number due to a change in ownership of the facility. Do not use this code when a recipient moves from one facility to another.
Negative	080	No longer in use.
	088	Use to terminate facility payment for a date that is before the latest facility positive or negative date on the screen.

**System-Generated Codes**

These action codes do not generate a notice.

CODE	EXPLANATION OF CODE
(086)	Entered by the system to cancel SNAP due to expiration of the certification period.
(087)	Entered by the system to cancel Medicaid due to the expiration of a medical eligibility period and to cancel FIP due to expiration of the hardship period.
(089)	Entered by the system to cancel Medicaid at the end of the second month of automatic redetermination.

**WIFS Messages**

This section contains information about WIFS messages. “WIFS” stands for “warnings, informational, fatal, and summary.” WIFS messages are E-mail messages sent to inform income maintenance workers that action may need to be taken on a designated system. Although WIFS E-mail indicates that it was sent from the SPIRS Help Desk or IM Systems Mainframe, it is actually system-generated. WIFS messages pertain only to:

- The ABC system,
- The MEPD billing system (see [14-C](#)),
- The SSNI (TXIX) system (see [14-C](#)),
- *hawk-i* referrals (see [14-C](#)), or

- The Individualized Services Information System (ISIS)
- The FACS System

Three types of WIFS messages are sent to income maintenance workers:

- W = Warning messages: A “W” message indicates a possible problem with the billing system or a person’s medical record. Check to make sure all the information entered the system is correct.
- I = Informational messages: An “I” message alerts you to certain conditions or provides information important to you.
- F = Fatal messages: An “F” message notifies you that the billing system has not updated for an individual. You should take an action in order to allow the system to update.

The S = Summary message is not sent to income maintenance workers. These messages are sorted by program and are printed in a report for use by data processing staff.

Each WIFS E-mail you receive contains information about only one person and may include:

- Your worker number
- Your county number
- The client’s state identification number
- The client’s case name
- The client’s case number
- The system that generated the message (HWKI, ISIS, MEPD, TXIX, FACS, and ABC)
- The type of message (warning, informational, or fatal)
- The program number (located after the type of message). For research purposes only.
- The WIFS message number (located after the program number). This is the number that corresponds to the message that is included in the E-mail.
- A generic field. This field is used to relay specific information to the income maintenance worker in addition to the WIFS message. It may contain an aid type, a benefit month, or a worker number/county number code, or it could be blank.
- The actual WIFS message. This message informs you of the reason the WIFS was issued.

The table below explains the ABC-related WIFS messages an income maintenance worker could receive.

<b>WIFS No.</b>	<b>Message Sent To Worker</b>	<b>Definition/Resolution</b>
0001 IABC	Quarterly supplement check cannot be issued until after fatal WAR is corrected.	Correct the WAR on this case. The supplement for Medicare and Medicaid eligibles cannot be issued until after the correction updates.
0002 IABC	Delete TD06 entries that are blocking issuance of quarterly supplement payment.	The supplement for Medicare and Medicaid eligibles could not be issued for this person due to another TD06 entry on the scheduled date of issuance. Delete your TD06 entries. After the SMME check has been issued, you may re-enter the TD06 for the benefit check amount.
IM Systems Mainframe (Buy-in)	Buy-in is complete on (date) for (SID and first name). This case is currently receiving the standard medical deduction for SNAP. If the household has any other verified medical expenses that would entitle them to the standard medical deduction, no action is needed. If not, remove the standard from the BCW1, click on the link below, and send the form to the household.	Medicare buy-in has occurred for this person. The household may no longer be eligible to receive the standard medical deduction. Evaluate the household's medical deductions and make any necessary changes.
IM Systems Mainframe (Buy-out)	Buy-out is complete on (date) for (SID and first name). If the household previously chose the standard medical deduction for SNAP, ensure that the BCW1 is coded to allow the standard. If the household chose actual expenses, no action is needed.	Medicare buy-out has occurred for this person. The household may be eligible to receive the standard medical deduction or a greater actual medical deduction. Evaluate the household's medical deductions and make any necessary changes.

WIFS No.	Message Sent To Worker	Definition/Resolution
IM Systems Mainframe (FACS)	(SID and person's name) has had a change in a foster care, adoption, or preadoption placement entered in FACS on (date). By ABC timely notice, IM needs to review the child's current placement in FACS to determine ongoing eligibility for FIP or Medicaid.	Check the person's FACS placement status. If the person is currently in a placement, cancellation of FIP or Medicaid on this case may be necessary.

### **Worker Action Messages**

All messages generated in processing of data appear on the Worker Action Report (WAR) screens. Abbreviations used on the WAR screens are found at the end of the Appendix. Messages are displayed by case on WAR1 screens and by county and worker on WAR2 and WAR3 screens.

Information on the WAR1 screen includes case number, tickler message, case name, origin, data entered, code number, severity, and process date.

WAR2 information includes county and worker numbers, case number, error message, case name, origin, data entered, severity, code number, and process date.

WAR3 information includes county and worker numbers, case number, tickler message, case name, origin, data entered, severity, code number, and process date.

There are no code numbers for tickler (reminder) messages. Tickler messages appear on the WAR1 and WAR3 screens when:

- The worker enters a message with a specific due date. The message is displayed on the worker action report screens with the corresponding print date; or
- The system generates tickler messages. (See [Automatic Tickler Messages.](#))

Informational messages (I) alert the worker to certain conditions or provide information. The message explains which entries were ignored or modified by the system and which special actions were performed. Informational messages appear on WAR1 and WAR3.

Nonfatal errors (NF) do not prevent processing. However, the erroneous entry in the specified field is not accepted and does not show in the field where the entry was attempted. Errors with numbers beginning with 0 are almost all nonfatal. Nonfatal errors appear on WAR1 and WAR3.

---

If an error is fatal (F), no entries for that case process to update the master file. For example, if TD02 Sections III and IV and TD06 are entered, and TD02 Section III has a fatal error, data for all these transactions are held, not processed. Fatal errors that occur in COLA processing stop the automated COLA process for that case. The worker must then manually complete the COLA process. Fatal errors appear on WAR1 and WAR2.

Error numbers of 500 and above are almost always fatal and indicate that the entry is invalid. It is possible that other entries made were also invalid but did not result in messages on the Worker Action Reports.

Error numbers 300 to 499 result when the system attempts to combine all of the information entered and is unable to complete the processing because pieces of information are missing.

For example: Error 323 “No BCW Line D entered this month” occurs if a SNAP case is opened with an effective date of April, but BCW1 data are entered only for the benefit months of May and June. The system is unable to complete the processing because a piece of information (April deductions) is missing.

“Origin” indicates the specific field on a screen involved with the error. It shows the field where entries were made or the field that needs an entry to complete the transaction.

“Origin” shows “UC” (update control) when the error is in the 300-499 category. The message indicates missing or incomplete information. It can also be informational.

Check the data to be sure that the various components are compatible (aid type, program status, person program status, income code, BCW state ID numbers, benefit months on BCW1 and BCW2, dates on TD02, TD03, TD04, TD05, TD06, etc.). If everything appears to be present and compatible, check case action chapters 14-B(5), 14-B(6), 14-B(7), and 14-B(9) to be certain that a valid transaction was coded.

If the origin indication is “ME” (month end), the error may not be the **direct** result of worker entry. Month-end errors occur when the system is processing information used to prepare next month’s benefits at ABC cutoff.

The entry causing a month-end error could have occurred any time during the month and could have been valid for daily processing at that time. The error may also have been caused by entries for the same clients on another case. Month-end errors mean that the benefits are not issued. Generally a TD06 issuance is required. These messages appear on WAR1 and WAR3.

“Data Entered” indicates what was actually entered on the system. It may also be the state ID of the individual in question. If there is a difference between “Data Entered” and what was intended, then the error may be attributed to entry of data. If “Data Entered” is consistent with what was intended, check 14-B-Appendix for valid entries and codes.

When review of worker action report messages indicates that correction is required, transactions may be modified for processing. Transactions are held until deleted by the worker or corrected and updated to the ABC master files.

069 I	TD03	The entry in TD03 MN is invalid for a case that is not medically needy.
070 I	BCW1	An entry of extended medical months has been ignored because it is not consistent with reinstatement or other coding.
071 I	TD03	A claim number entry was accepted. If the "Data Entered" column is blank, the last entry was to remove the number.
072 I	TD05	A disenrollment from a federally qualified HMO was attempted during the guarantee period (after the first 30 days but before 6 months). If disenrollment is appropriate, an override code is needed, with Managed Health Care Review Committee approval.
073 I	TD05 ADOM	The managed health care date was not necessarily incorrect, but is changed in conjunction with status for forced enrollment in mandatory counties.
074 I	TD05 ADOM	An attempt was made to change the start/close date for managed health care enrollment or disenrollment. There is only one acceptable effective date, based on timely notice. Once it is set, it cannot be changed.
075 I	TD05 ADOM	Entry of a managed health care option is allowed only when enrolling, correcting, or changing a managed health care provider.

CODE/SEV	ORIGIN	INSTRUCTIONS
076 I	TD05 ADOM	Entry of a managed health care plan type is allowed only when enrolling, correcting, or changing a plan type.
077 I	TD05 TD03	An attempt was made to enroll a case or person not eligible to enroll in managed health care.
078 I	TD01	No entry made for resident county. The worker county was assigned as the resident county. This message appears for foster care and subsidized adoption cases. If the state abbreviation is not IA, the resident county must be 00.
079 I	TD05 TD03	The system automatically reinstates managed health care enrollment if Medicaid is reinstated. Do not code managed health care entries when reinstating, unless the effective date of cancellation was before the effective date of enrollment.
080 I	TD05 ADOM	No entry was made to correct the managed health care option or plan type.
081 I	TD05 TD03 ADOM	Managed health care status indicates correction, but the case was not currently managed health care, the option entered was invalid, or the plan type entered was invalid.
082 I	TD05 TD03	The managed health care status entered was not acceptable for the case situation or other related entries.
083 I	TD05	An entry was made to disenroll a case or person from managed health care in a mandatory county. If disenrollment is appropriate, the action requires an override code and Managed Health Care Review Committee approval.
084 I	TD03	The system created case-level managed health care information, resulting in overcoding due to TD03 entries. TD03 managed health care entries are deleted.
085 I	ADOM	A case with an active Medicaid status has been opened for a person already enrolled in managed health care which serves the new case's county. A message is sent to the worker for the new case.

CODE/SEV	ORIGIN	INSTRUCTIONS
086 I	TD05	TD05 managed health care entries are modified or created by the system. Based upon the case situation, case-level managed health care actions have been changed or initiated by the system.
087 I	TD03	TD03 managed health care entries are modified or created by the system. Based upon the individual situation, person-level managed health care actions have been changed or initiated by the system.
088 I	TD05 TD03	Based on the managed health care status entry, the reason code entered is not compatible or is invalid.
089 I	TD05 ADOM	A date not compatible with effective date guidelines was entered. The system corrected the date or removed one that should not have been there.
090 I	ADOM	Inappropriate ADOM entries were made for the status entered.
091 F	BCW2	Income entry error. Reenter all income.
092 I	TD02 TD03	The approval date was changed to 01 because the approval month and year entered are future.
093 I	UC TD	An in-cycle RRED was generated.
094 I	UC TD	An out-of-cycle MEDR, or RRED was generated. The worker must track the due date.
095 I	TD03	“Retro 30 1/3 ADJ” issued when the system documents the 30 and 1/3 months and end date on retroactive medical case calculations. If the retroactive months when 30 1/3 was applicable are not continuous to the medical approved month, it may be necessary to add to or reset the 30 and 1/3 number of months.
096 I	TD03	“Susp 30 1/3 ADJ” issued for the month of suspension when the system recalculates the 30 and 1/3 expiration date, on FIP cases where the month of suspension was lifted.

CODE/SEV	ORIGIN	INSTRUCTIONS
097 I	TD03	Prospective benefit income (P E/B) replaced benefit (B E/B) income for the current calendar month. If there was a significant difference in the amounts of earnings, the system had to adjust the 30 + 1/3 counting.
098 I	TD05 ADOM	A MediPASS provider number was entered for a status that was not active.
099 I	TD05 ADOM	A MediPASS provider number was entered, but the managed health care option was not 99.
100 I	TD05	The MR code defaults to an "N" for this aid type.
105 I	TD03	Case contains child(ren) with a date in the LPR DT field. Verify continued LPR status for children to remain eligible at annual review.
250 F	TD03 271	Entry of "Y" in the INHOME field is not allowed unless the TD02 FIP status is "A, B, C, D, or E." If the TD02 FIP status is not in one of these codes, change the INHOME entry to "N."
252 F	TD03	Aid type not eligible for suspension. PSC field is entered, but the MED AID TYPE does not qualify for Medicaid suspension.
253 F	TD05	Last review date must be entered on TD05. If A is entered in PSC field, then must also enter last review date on TD05.
254 F	TD05	Multiple cases, cancel case not suspended. Worker must make entries on multiple cases that are not eligible for limited Medicaid prior to updating MED Case.
255 F	TD03	Space PSC field and enter zeros in PSC DATE. Worker is not allowed to open a case unless the PSC field has been updated to spaces on TD03.
256 F	TD03	Entries are needed in PSC and PSC DATE field. When suspending on TD05, the worker must enter TD03 PSC of A and PSC DATE. When reopening a case on TD05, the worker must enter TD03 PSC of Z and PSC DATE.
257 F	TD05	RSN2 must be 430 if PSC is A.
258 F	TD05	RSN1 must be 433 if PSC is Z.
259 F	TD05	RSN1 must be 434 if PSC is Z.
260 F	TD03	PSC entry of space is not allowed.
261 F	TD03	Must end limited services before canceling case.

CODE/SEV	ORIGIN	INSTRUCTIONS
970 I	UC	<p>Death was reported on another case or program. In the processing which occurs daily, individual records with notice reasons 613 (indicating death) are deleted. The state ID number is removed from all cases in the system with which it is associated. If the person's program status on any other case is A, B, C, D, E, F, H, I, or J, it is changed to N and this message is generated.</p> <p>If the person who died is the PAYEE on ICSC, and the ABC case number for the children on ICSC will remain the same because a new payee is assigned to that case, you must inform CSRU of the replacement payee name in REFER comments. Indicate the reason for the change is death of the original payee.</p> <p>If the program is one for which ABC does not calculate eligibility, you must redetermine eligibility if there are other persons on the case. If the only eligible child is deceased, action to close the case is probably needed.</p> <p>For SNAP, you may need to re-enter shelter deductions if they were attached to the person who died.</p> <p>On system-calculated cases, the system recomputes benefits in the <u>next</u> daily processing. (Check the CALC TXNS screen to see if the system will recompute.)</p>
971 F		<p>This case has a person with an OHP code of 1 (NIS indicator). COLA income has been entered but the case was not recalculated on ABC. Review the diversion amount and other income and make appropriate BCW entries on ABC, to cause a recalculation.</p>
972 I		<p>Unearned income source code "A" (SSI income) was missing for COLA processing. The system placed the code "A" and the amount in the BCW2 record and recalculated the case.</p>
973 I		<p>Unearned income source code "B" (SSA income) or "T" (Black Lung income) was missing for COLA processing. The ABC system placed the code and amount in BCW2 and recalculated the case.</p>

CODE/SEV	ORIGIN	INSTRUCTIONS
974 F	UC	<p>Income records could not update or be recalculated for COLA processing because there were too many BCWs.  <b>NOTE:</b> The system allows only 24 income records per person.</p> <p>If there are too many income records, wait until after the next cutoff to enter more income. (Depending on your case's situation, you may have to cancel the program or the person and make a TD06 entry for the coming month.)</p>

978 F	TD02 TD05 TD03	<p>A notice reason indicating death was entered for the same individual on one program on the case but not for another program. Make TD03 entries for each program. If this is a one-person case, the entries can be made at the program level.</p>
980 F		<p>For SNAP, COLA processing requires a BCW income record that contains both "E" and "B" income indicators. Either an "E" or a "B" income indicator was not found.</p>

CODE/SEV	ORIGIN	INSTRUCTIONS
981 F		For FIP, COLA processing requires a BCW income record that contains both "E" and "B" income indicators. Either an "E" or a "B" income indicator was not found.
982 F		For Medicaid, COLA processing requires a BCW income record that contains both "E" and "B" income indicators. Either an "E" or a "B" income indicator was not found.
983 F		For facilities, COLA processing requires a BCW income record that contains both "E" and "B" income indicators. Either an "E" or a "B" income indicator was not found.
984 F		A person on the case has a Miller Trust (MAIT) income. ABC COLA processing does not occur for Medicaid or facility cases if a person on the case has such income. Make entries for Medicaid or facility income records that reflect the new Miller Trust (MAIT) amount.
985 F		SSA sent an SSI COLA record for a person who has a FIP or FMAP status of "A," "B," "C," "E" (FIP only), "H," "F," or "I." No FIP or FMAP income record was created or updated.
986 I		The Social Security COLA amount used is different from the BENDEX amount because recoupment exists at SSA. The amount before recoupment is counted as income on facility cases. The ABC system updated the income and recalculated the case.
987 F		This case has a person with a couple case indicator (OHP code of 2) and so must have worker entries for COLA. COLA income has not been entered on ABC.
988 I		This case has a person with dual or triple entitlement for social security. Social security may not have updated correctly during COLA. Review BENDEX and update ABC if needed.
989 F		Unearned income source code of B, T, or A was missing for COLA processing. The code and amount could not be placed in BCW2 entries because all unearned income fields are in use. Review the BCW2s and enter income as appropriate.
990 F	TD03 181	The payee relationship is required or invalid.

CODE/SEV	ORIGIN	INSTRUCTIONS
991 F	TD03 187	Deprivation coding is required or invalid. All individuals on a case with a relationship code of A, C, E, 2, 3, 4, 5, 6, or 8 must have a deprivation code.
992 F	ICSC	<p>An ICAR payee link is required, or the existing link is invalid. If anyone is linked to an ICAR case with a role code of "G" or "J" (child), then someone must be linked as a payee. There cannot be more than one payee linked to an ICAR case. If death is recorded for a current ICAR payee, a new payee must be linked.</p> <p>After correcting the ICAR error, make an entry in ABC to get ABC to update.</p>
993 F	TD03 PAT	The paternity code is required or invalid. A paternity code is required for all active children on a FIP or FMAP-related Medicaid case. "Child" is defined by relationship code.
994 F	TD03 ST	The birth state entry is required or invalid. A valid birth state is required for all active children on a FIP or FMAP-related Medicaid case. "Child" is defined by the relationship code.
995 F	ICSC	<p>A CSRU link is required. If any active child on a FIP or FIP-related Medicaid case has a deprivation code of "A" or "D," all individuals on the case are required to have a link record.</p> <p>This message also occurs if the worker number on ABC indicates an institution (MHI or hospital school) case, <b>and</b> a referral to ICAR was attempted.</p>
996 F	TD03 266	The qualifying parent code is required or invalid. An adult on a UP case (payee relationship code of 0 or 1) must have a code of "P" or "Q."
997 I	ICSC	The client died. Check the ICAR referral and enter a new referral and payee, if appropriate.

CODE/SEV	ORIGIN	INSTRUCTIONS
999 F	UC	<p>There is a fatal error related to information printed in the "data entered" column. This error may indicate that there are too many income records. There is room for 24 income records per person.</p> <p>If there are too many income records, wait until after the next cutoff to enter more income. (Depending on your case's situation, you may have to cancel the program or the person and make a TD06 entry for the coming month.)</p>

### **Benefits History Information**

These codes are used on the BH01 screen. See 14-B(4), [BH01=Benefit History](#), for additional information on the screen.

FIP and SNAP recoupment types determine the rate of benefit reduction. The codes are:

<u>Code</u>	<u>Type of Error</u>
A	FIP; client caused error
B	FIP; agency caused error
C	SNAP; client inadvertently caused error
E	SNAP; agency caused error
F	SNAP; client intentionally caused error
G	CSRU; client caused error
I	Transportation; agency caused error
J	Transportation; client caused error
K	Child care; agency caused error
L	Child care; client caused error
M	Other PROMISE JOBS expenses; agency caused error
N	Other PROMISE JOBS expenses; client caused error
O	Transitional child care; agency caused error
P	Transitional child care; client caused error

The ADD'L MED field displays a code which describes the current transitional or extended Medicaid period of eligibility.

<u>Code</u>	<u>Explanation</u>
0	Not applicable. (There is currently no transitional or extended Medicaid eligibility.)
1	Transitional Medicaid's first six-month period; current data indicate there will be a second period.
2	Transitional Medicaid's second six-month period.
3	Transitional Medicaid's first six-month period, but the quarterly report was not returned.
4	Extended Medicaid.

### **Issuance Verification System**

The ABC and ICAR systems use the Issuance Verification System (ISSV) for verification of benefits received and for authorization of benefits issued (by the ABC system, the ICAR system, or the IM worker). The ISSV system is used for SNAP action code correction.

The ISSV system includes the history of:

- Benefits issued to a case and the people who received those benefits,
- Child support rebate payments made to clients,
- Client income exempted for child support rebates, and
- Cash recoupment payments made by clients and adjustments for those payments.

The ISSV system does not include recoupments by grant reduction. A case issuance history is retained without regard to the case program status codes, the death of household members, the existence of a case record on ABC, etc.

Monthly grant data are available from July 1986. Daily grant data are available from July 1985. Grant data are not purged from ISSV.

SNAP data are saved or added to the display until the effective month of the issuance is over five years old, unless it is a SNAP refund (i.e. Bliet lawsuit), then it is saved indefinitely. SNAP data over five years old are deleted from ISSV annually.

Child support rebate payment data are available from October 1987. Rebate payment data are not purged from ISSV. Data on income exempted for child support rebates are available from April 1991. Exempted income data are not purged from ISSV.

Cash recoupment payments and adjustments are available from May 1982. Recoupment data are not purged from ISSV, but data were purged from the recoupment system before the addition of recoupment data to ISSV. Before April 1991, data were purged for debtors who had all claims closed for a three-year period.

All grants except system-issued and exempted-income rebates are designated on ISSV with the word “WARRANT,” regardless of the system responsible for or the method of distribution to the client. (This includes TD06 child support rebates.) The last seven digits of the warrant number are listed under the CONTROL NUMBER field. (The first digit is a zero for a regular issuance warrant.)

The action code letter defines the reason for the warrant issuance or cancellation. (Action code “J” indicates worker-issued, system-issued, and exempted-income child support rebates.)

“DIR DEP” indicates the grant is deposited into the client’s bank account. “EAC” indicates the grant is deposited into the client’s electronic access card (EAC) account.

All SNAP issuance is designated on ISSV as “SNAP.” The action code defines the reason for issuance, denial, or return. “EBT” indicates that the allotment is accessible to the client through the EBT plastic card system. The special issuance code ‘E’ indicates the allotment is credited to an EBT account.

System-issued rebates are designated on ISSV as “SYS-REBATE.” Rebates by exemption of child support income are designated on ISSV as “EXP/REBATE.” All rebates use action code “J.”

Cash recoupment payments and adjustments are identified as “FIP-REPAY” or “FS-REPAY.” Action code “S” indicates a reduction from the claim balance. Action code “A” indicates an addition to the claim balance (usually due to an error in subtraction, e.g., a wrong claim or wrong amount subtracted).

The same action code letters are used for both grants and SNAP; the screen designate the type of benefit issued. Obsolete codes are listed.

N	Central office issuance of food stamp coupons (obsolete)

The following chart lists:

- The types of SNAP benefit authorizations that a worker can enter.
- The other unreturned authorizations for the same case and month that the ISSV checks for possible duplicates.
- The codes checked on ISSV for a duplicate. The codes used are defined above.
- Notes on whether the system stops the issuance only when the new authorization is the exact amount of the previous one.

When the ISSV system blocks a duplicate issuance, review the issuances for the month using the case record and the ISSV screen. See 14-B(4), [Issuance Verification System \(ISSV\)](#) for instructions on ISSV screen viewing. If the issuance is valid, the supervisor must send an email to SPIRS. The email should list the case name, case number, county and worker numbers, worker name, IMM/CAN code, dollar amounts, effective date, and issue date.

On-line tickler messages are generated to IM workers based on the inventory control process. (See [Automatic Tickler Messages](#).)

## Automatic Tickler Messages

Most automatic tickler messages are generated to the month-end Worker Action Report; others are on daily Worker Action Reports. Supervisory tracking of the month-end Worker Action Report is required. Workers must use established county office procedures and verify that appropriate action has been taken for each case listed on the monthly screens and printout.

TOPIC	MESSAGE	INSTRUCTIONS
Age 18	(State ID) individual turns 18.	Reevaluate eligibility of this person.
Age 18	(State ID) minor parent turns 18.	Reevaluate eligibility of this person.
Automatic redetermination	Active automatic redetermination case.	Medicaid will be canceled to prevent more than two months in automatic redetermination.
BENDEX	(State ID) (case last name) new BENDEX received.	Review BENDEX screens on IEVS for new data. Update income on ABC, if necessary. This tickler is not generated if the response is NOFILE.  This tickler is also generated when a social security number discrepancy exists. See 14-G, <a href="#">Social Security Number Verification</a> , for resolution of discrepancies.
BENDEX	(State ID) (case last name) new BENDEX claim number added.	Review BENDEX screens on IEVS. A record sent from SSA has a matching social security number and state ID. However, the claim number is spaces or blanks or does not match the current claim number.
BENDEX	(State ID) (case last name) new BENDEX claim number added to IEVS.	Review BENDEX screens on IEVS. Decide if the new claim number should be entered on ABC.
