

2024 HIV and Hepatitis Prevention Program Snapshot

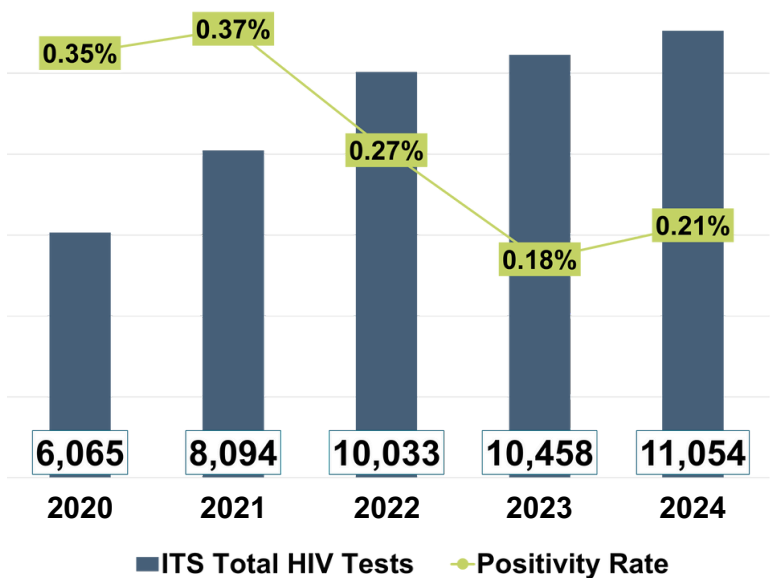

Integrated Testing Services: HIV Screening

ITS HIV Screening and Positivity 2020-2024

The Integrated Testing Services (ITS) program administered 11,054 HIV tests across 12 participating agencies in 2024.

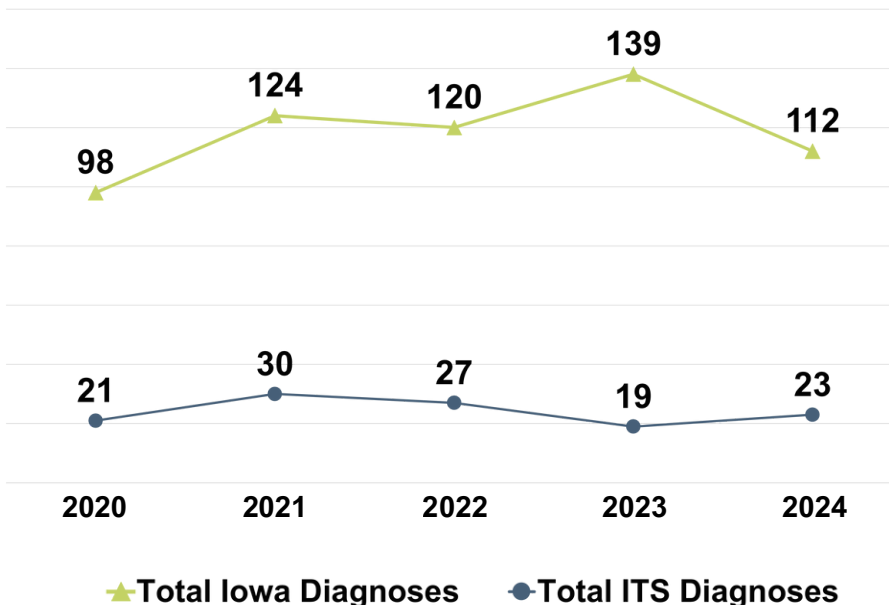

This represents a 6% increase from 2023 and is 21% higher than the five-year average of 9,141 tests per year.

The rate of people newly diagnosed with HIV in ITS settings increased in 2024 resulting in a 0.21% positivity rate, while remaining below the five-year positivity rate of 0.26%.

Data are not de-duplicated. Numbers represent test encounters not unique individuals.

ITS HIV Diagnoses vs State Totals 2020-2024

The proportion of individuals newly diagnosed with HIV in Iowa identified through ITS program activities increased to 21% of new diagnoses in 2024 compared to 14% in 2023 and 20% over the five-year period represented.

Overall, Iowa has seen a total increase in newly reported HIV infections of 14% between 2020 and 2024.
