## Introduction

The MBQIP 2025 Core Measures is a list of quality measures the Federal Office of Rural Health Policy (FORHP) at the Health Resources and Services Administration (HRSA) is adopting for use in the Medicare Beneficiary Quality Improvement Project (MBQIP) within the [Medicare Rural Hospital Flexibility Program](#).

Starting in calendar year 2025, hospitals will collect data to report on the updated MBQIP core measures set as part of the Flex Program. Details on the new MBQIP core measure set along with those measures continuing from the current MBQIP measure set are depicted in the following tables.

During calendar years 2023 and 2024, hospitals should continue reporting the [existing MBQIP core measure set](#). In addition, hospitals are encouraged to start reporting on the measures that will be new in MBQIP 2025 as soon as they are able. At a minimum, hospitals need to put processes in place so they can collect and report data from the 2025 calendar year. During this time, State Flex Programs and the RQITA team are available to assist hospitals and health systems with the transition.

The Federal Office of Rural Health Policy (FORHP), at the Health Resources and Services Administration (HRSA), selected the 2025 MBQIP Core Measure Set, based on alignment with CMS and CDC national quality measure standards. This 2025 MBQIP Core Measure Set, has been adopted after a process involving FORHP staff, State Flex Programs, Critical Access Hospitals, and public comment input. Though these measures are finalized, they are always subject to change as necessary, to respond to changes in

Click [here](#) to return to the Table of Contents

federal and state health care quality programs, as well as to support the needs of rural hospitals and the communities they serve.

This resource is intended to be used by critical access hospital personnel involved in MBQIP quality improvement and reporting and State Flex Program coordinators. This guide is based on currently available information. Information provided and submissions dates are subject to change.

The MBQIP 2025 Core Measure Set is detailed in this guide.

Measures in gold denote **^new measures added for MBQIP reporting within the Flex Program** and are to be added to reporting data by calendar year 2025.

Measures in \*blue denote **existing measures within the MBQIP Flex Program**.

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – CAH Quality Infrastructure	
MBQIP Domain	Global Measures
Measure Description	<p>Structural measure to assess CAH capacity, processes, and infrastructure for quality activities based on the eight core elements of CAH quality infrastructure:</p> <ol style="list-style-type: none"> <li>1. Leadership Responsibility &amp; Accountability</li> <li>2. Quality Embedded within the Organization’s Strategic Plan</li> <li>3. Workforce Engagement &amp; Ownership</li> <li>4. Culture of Continuous Improvement through Behavior</li> <li>5. Culture of Continuous Improvement through Systems</li> <li>6. Engagement of Patients, Partners, and Community</li> <li>7. Collecting Meaningful and Accurate Data</li> <li>8. Using Data to Improve Quality</li> </ol>
Measure Rationale	<p>This measure will provide state and national comparison information to assess your CAH infrastructure, QI processes, and areas of improvement for each facility. Using this measure, SFPs can plan quality activities to improve CAH quality infrastructure. Data will provide timely, accurate, and useful CAH quality-related information to help inform state-level technical assistance for CAH improvement activities. This measure will provide hospital and state-specific information to help inform the future of MBQIP and national technical assistance and data analytic needs. The intention is to identify areas of need in quality infrastructure and capacity in order to implement continuous processes.</p>
Population and Definitions	<p>The unit of measurement is an individual CAH. This structural measure captures assessment data from individual CAHs as they reflect on the infrastructure capacity specific to their facility.</p> <p>Answers for the measure should reflect the current point in time unless otherwise specified (e.g., if a question asks about a quarterly or an annual process, is that process in place at the current point in time). CAHs should attest to the information only where they completely meet the description in the question response(s) for the correlating criteria and elements.</p>
Calculations	<p>Hospital score can be a total of zero (0) to eight (8) points (one point for each element, must meet each of element’s criteria to receive credit).</p>

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – CAH Quality Infrastructure	
MBQIP Domain	Global Measures
Measure Submission and Reporting Channel	<p>The measure is submitted annually through the National CAH Quality Inventory and Assessment (“Assessment”) via a Flex Monitoring Team (FMT)-administered Qualtrics platform.</p> <p>CAHs must submit the Assessment on their own behalf through the Qualtrics platform for the measure to be accepted (emailed submissions are not accepted).</p> <p>By submitting the Assessment, CAHs are submitting the CAH Quality Infrastructure measure. Submissions of the Assessment (and within it the CAH Quality Infrastructure measure) are due in November of each year, and late submissions of the Assessment and the measure within it will not be accepted.</p>
Measure Resources	<p><b><u>CAH Quality Infrastructure Specifications</u></b></p> <p>This includes more information about how the measure is collected and how each question from the Assessment maps to the core elements and criteria of CAH Quality Infrastructure.</p> <p><b><u>CAH Quality Inventory &amp; Assessment Resources for CAHs</u></b></p> <p>This page includes several resources for CAHs to use to complete the 2024 CAH Quality Inventory and Assessment. Included is a CAH Fact Sheet, Assessment Questions &amp; Instructions, the 2023 Assessment National Report and an Assessment Informational Recording.</p> <p><b><u>RQITA Website: CAH Quality Infrastructure</u></b></p> <p>Listed here are measure specifications and reporting details.</p>

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Safe Use of Opioids – Concurrent Prescribing	
MBQIP Domain	Patient Safety
Encounter Period	Calendar Year (January 1, 20XX – December 31, 20XX)
Submission Deadline	February 28, 20XX ; Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable.
Measure Description	Proportion of inpatient hospitalizations for patients 18 years of age and older prescribed, or continued on, two or more opioids, or an opioid and benzodiazepine concurrently at discharge.
Measure Rationale	Unintentional opioid overdose fatalities have become an epidemic and major public health concern in the United States. Concurrent prescriptions of opioids, or opioids and benzodiazepines, places patients at a greater risk of unintentional overdose due to increased risk of respiratory depression. Patients who have multiple opioid prescriptions have an increased risk for overdose, and rates of fatal overdose are ten (10) times higher in patients who are co-dispensed opioid analgesics and benzodiazepines than opioids alone. A measure that calculates the proportion of patients with two or more opioids or opioids and benzodiazepines concurrently has the potential to reduce preventable mortality and reduce costs associated with adverse events related to opioids.
Measure Program Alignment	Safe Use of Opioids is a current measure of the Medicare Promoting Interoperability (PI) Program. Critical access hospitals must meet PI Program requirements on an annual basis to avoid a downward payment. One of the program requirements is submission of electronic clinical quality measures (eCQM) data from certified electronic health record technology (CEHRT).
Improvement Noted As	Decrease in the rate
Numerator	Inpatient hospitalizations where the patient is prescribed or continuing to take two or more opioids or an opioid and benzodiazepine at discharge.
Denominator	Inpatient hospitalizations that end during the measurement period, where the patient is 18 years of age and older at the start of the encounter and prescribed one or more new or continuing opioid or benzodiazepine at discharge.
Exclusions	Inpatient hospitalizations where patients have cancer pain that begins prior to or during the encounter or are ordered or are receiving palliative or hospice care (including comfort measures, terminal care, and dying care) during the hospitalization or in an emergency department encounter for observation stay immediately prior to hospitalization, patients receiving medication for opioid use disorder, patients with sickle cell disease, patients

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Safe Use of Opioids – Concurrent Prescribing	
MBQIP Domain	Patient Safety
	discharged to another inpatient care facility or left against medical advice, and patients who expire during the inpatient stay.
Measure Population (Determines the cases to abstract/submit)	Inpatient hospitalizations that end during the measurement period, where the patient is 18 years of age and older at the start of the encounter and prescribed one or more new or continuing opioid or benzodiazepine at discharge.
Sample Size Requirements	No sampling – report all patients that meet data elements
Calculations	Numerator divided by Denominator
Data Source	Certified electronic health record technology (CEHRT)
Data Collection Approach	Electronic Extraction from EHRs via Quality Reporting Document Architecture (QRDA) Category I File
Measure Submission and Reporting Channel	Annually, via Hospital Quality Reporting (HQR) Secure Portal as any combination of: QRDA Category I File, zero denominator declarations and/or case threshold exemptions (<=5 cases in the reporting quarter)
Data Available On	<ul style="list-style-type: none"> <li>• <a href="#">CMS Care Compare</a></li> <li>• <a href="#">CMS Provider Data Catalog</a></li> </ul>
Measure Resources	<ul style="list-style-type: none"> <li>• <a href="#">RQITA Website: Safe Use of Opioids Concurrent Prescribing</a></li> <li>• <a href="#">Critical Access Hospital eCQM Resource List   National Rural Health Resource Center (ruralcenter.org)</a></li> </ul>

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Hybrid Hospital-Wide Readmission	
MBQIP Domain	Care Coordination
Encounter Period	July 1st, 20XX - June 30th, 20XX
Submission Deadline	September 30, 20XX ; Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable.

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Hybrid Hospital-Wide Readmission	
MBQIP Domain	Care Coordination
Measure Description	<p>Hospital-level, all-cause, risk-standardized readmission measure that focuses on unplanned readmissions 30 days of discharge from an acute hospitalization.</p> <p>Hybrid measures differ from the claims-only measures in that they merge electronic health record (EHR) data elements with claims-data to calculate the risk-standardized readmission rate. The Hybrid HWR was developed to address complex and critical aspects of care that cannot be derived through claims data alone. The Hybrid HWR uses EHR data including clinical variables and linking elements for each patient:</p> <ul style="list-style-type: none"> <li>Clinical variables (13): Heart Rate, Systolic Blood Pressure, Respiratory Rate, Temperature, Oxygen Saturation, Weight, Hematocrit, White Blood Cell Count, Potassium, Sodium, Bicarbonate, Creatinine, Glucose</li> <li>Linking elements (5): CMS Certification Number (CCN), National Provider Identifier (NPI) for MA patients, Medicare beneficiary Identifier (MBI), Inpatient Admission Date, and Discharge date.</li> </ul> <p>It is recommended <b>hospitals only report the FIRST resulted value for EACH core clinical data element</b> collected in the appropriate timeframe, if available. Hospitals may also choose to report ALL values on an encounter during their entire admission; however, only the first resulted values are utilized in the logic for measure calculation.</p>
Measure Rationale	<p>Returning to the hospital for unplanned care disrupts patients' lives, increases risk of harmful events like healthcare-associated infections, and results in higher costs absorbed by the health care system. High readmission rates of patients with clinically manageable conditions in primary care settings, such as diabetes and bronchial asthma, may identify quality-of-care problems in hospital settings. A measure of readmissions encourages hospitals to improve communication and care coordination to better engage patients and caregivers in discharge plans and, in turn, reduce avoidable readmissions and costs.</p>
Measure Program Alignment	CMS Inpatient Quality Reporting (IQR) program measure.

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Hybrid Hospital-Wide Readmission	
MBQIP Domain	Care Coordination
Improvement Noted As	No actual measure score will be generated by hospitals. Instead, hospitals will report the data values for each of the core clinical data elements for all encounters in the Initial Population. These core clinical data elements will be linked to administrative claims data and used by CMS to calculate results for the Hybrid HWR measure.
Numerator	If a patient has more than one unplanned admission (for any reason) within 30 days after discharge from the index admission, only one is counted as a readmission. The measure looks for a dichotomous yes or no outcome of whether each admitted patient has an unplanned readmission within 30 days. However, if the first readmission after discharge is considered planned, any subsequent unplanned readmission is not counted as an outcome for that index admission because the unplanned readmission could be related to care provided during the intervening planned readmission rather than during the index admission.
Denominator	1. Enrolled in Medicare FFS Part A for the 12 months prior to the date of admission and during the index admission or enrolled in Medicare Advantage; 2. Aged 65 or over; 3. Discharged alive from a non-federal short-term acute care hospital; 4. Not transferred to another acute care facility
Exclusions	The measure excludes index admissions for patients: 1. Admitted to Prospective Payment System (PPS)-exempt cancer hospitals; 2. Without at least 30 days post-discharge enrollment in Medicare FFS; 3. Discharged against medical advice (AMA); 4. Admitted for primary psychiatric diagnoses; 5. Admitted for rehabilitation; or 6. Admitted for medical treatment of cancer
Measure Population (Determines the cases to abstract/submit)	All Medicare FFS and MA hospitalizations for patients aged 65 and older at the start of an inpatient admission, where the length of stay is less than 365 days, and the hospitalization ends during the measurement period.  The initial population includes patients with inpatient hospitalizations and patients from Acute Hospital Care at Home programs, who are treated and billed as inpatients but receive care in their home.  <b>NOTE:</b> All Medicare FFS and MA hospitalizations meeting the above criteria should be included, regardless of whether Medicare FFS/MA is the primary, secondary, or tertiary payer.

New Measure for MBQIP Reporting Within the Flex Program															
MBQIP 2025 Core Measure Set															
Measure Name – Hybrid Hospital-Wide Readmission															
MBQIP Domain	Care Coordination														
Sample Size Requirements	No sampling – report on all information requested in denominator and numerator.														
Data Collection Approach	Hybrid – chart extraction of electronic clinical data and administrative claims data.														
Data Elements	<b>Core Clinical Data Elements (13)</b> <table> <tr> <td>Heart Rate</td><td>White Blood Cell Count</td></tr> <tr> <td>Systolic Blood Pressure</td><td>Potassium</td></tr> <tr> <td>Respiratory Rate</td><td>Sodium</td></tr> <tr> <td>Temperature</td><td>Bicarbonate</td></tr> <tr> <td>Oxygen Saturation</td><td>Creatinine</td></tr> <tr> <td>Weight</td><td>Glucose</td></tr> <tr> <td>Hematocrit</td><td></td></tr> </table> <p><b>For each encounter, please also submit the following Linking Variable:</b></p> <ul style="list-style-type: none"> <li>• CMS Certification Number (CCN)</li> <li>• National Provider Identifier (NPI) for MA patients</li> <li>• Medicare Beneficiary Identifier (MBI)</li> <li>• Inpatient Admission Date</li> <li>• Discharge Date</li> </ul>	Heart Rate	White Blood Cell Count	Systolic Blood Pressure	Potassium	Respiratory Rate	Sodium	Temperature	Bicarbonate	Oxygen Saturation	Creatinine	Weight	Glucose	Hematocrit

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Screening for Social Drivers of Health (SDOH Screening)	
MBQIP Domain	Care Coordination
Encounter Period	Calendar Year (January 1, 20XX – December 31, 20XX)
Submission Deadline	May 15, 20XX ; Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable.

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Screening for Social Drivers of Health (SDOH Screening)	
MBQIP Domain	Care Coordination
Measure Description	<p>The Screening for Social Drivers of Health Measure assesses whether a hospital implements screening for all patients that are 18 years or older at time of admission for food insecurity, housing instability, transportation needs, utility difficulties and interpersonal safety.</p> <p>To report on this measure, hospitals will provide: (1) The number of patients admitted to the hospital who are 18 years or older at time of admission and who are screened for each of the five HRSNs: Food insecurity, housing instability, transportation needs, utility difficulties, and interpersonal safety; <b>and</b> (2) the total number of patients who are admitted to the hospital who are 18 years or older on the date they are admitted.</p> <p>A specific screening tool is not required to be used, but all areas of health-related social needs must be included.</p>
Measure Rationale	<p>The recognition of health disparities and impact of health-related social needs (HRSN) has been heightened in recent years. Economic and social factors, known as drivers of health, are known to affect health outcomes and costs, and exacerbate health inequities. This measure is derived from the Center for Medicare and Medicaid Innovation’s Accountable Health Communities (AHC) model and has been tested in large populations across states. The intent of this measure is to help ensure hospitals are considering and addressing social needs in the care they provide to their community.</p>
Measure Program Alignment	This is a CMS Hospital Inpatient Quality Reporting (IQR) program measure.
Improvement Noted As	Increase in the rate.
Numerator	The number of patients admitted to an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the following five HRSNs: Food insecurity, housing instability, transportation needs, utility difficulties, and interpersonal safety during their hospital inpatient stay
Denominator	<p>The number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission.</p> <p>Please note you should not submit zeros in the denominator if no patients meet denominator criteria.</p>

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Screening for Social Drivers of Health (SDOH Screening)	
MBQIP Domain	Care Coordination
Exclusions	The following patients would be excluded from the denominator: (1) Patients who opt-out of screening. (2) Patients who are themselves unable to complete the screening during their inpatient stay and have no legal guardian or caregiver able to do so on the patient's behalf during their inpatient stay. (3) Patients who expire during the inpatient stay.
Measure Population (Determines the cases to abstract/submit)	The number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission.
Sample Size Requirements	No sampling – report on all information requested in denominator and numerator.
Calculations	The Screening for Social Drivers of Health measure is calculated by dividing the total number of hospital inpatients who are 18 years or older at time of admission and screened for all five health HRSNs by the total number of patients admitted to a hospital inpatient stay and who are 18 years or older at the time of admission.
Data Source	Hospital tracking
Data Available On	The SDOH measures will be publicly reported in the October 2025 public reporting release.
Measure Submission and Reporting Channel	Annual numerator and denominator submission through Hospital Quality Reporting (HQR) System
Measure Resources	<ul style="list-style-type: none"> <li>• <a href="#">RQITA Website: Social Drivers of Health</a></li> <li>• <a href="#">Social Needs Screening Tool Comparison Table   SIREN (ucsf.edu)</a></li> <li>• <a href="#">Guide to social needs screening (aafp.org)</a></li> <li>• Local resources to address SDOH: <a href="#">Neighborhood Navigator   AAFP</a></li> <li>• <a href="#">Rural Health Disparities Overview - Rural Health Information Hub</a></li> </ul>

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Screen Positive Rate for Social Drivers of Health	
MBQIP Domain	Care Coordination
Encounter Period	Calendar Year (January 1, 20XX – December 31, 20XX)
Submission Deadline	May 15, 20XX ; Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable.
Measure Description	The Screen Positive Rate for Social Drivers of Health Measure provides information on the percent of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission, were screened for an HRSN (health-related social needs), and who screen positive for one or more of the following five HRSNs: Food insecurity, housing instability, transportation problems, utility difficulties, or interpersonal safety.
Measure Rationale	The recognition of health disparities and impact of health-related social needs (HRSN) has been heightened in recent years. Economic and social factors, known as drivers of health, are known to affect health outcomes and costs, and exacerbate health inequities. This measure is derived from the Center for Medicare and Medicaid Innovation's <a href="#">Accountable Health Communities</a> (AHC) model and has been tested in large populations across states. The intent of this measure is to help ensure hospitals are considering and addressing social needs in the care they provide to their community.
Measure Program Alignment	This is a CMS Inpatient Quality Reporting (IQR) program measure.
Improvement Noted As	This measure is not an indication of performance.
Numerator	The number of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission, who were screened for all five HRSN, and who screen positive for having a need in one or more of the following five HRSNs (calculated separately): Food insecurity, housing instability, transportation needs, utility difficulties, or interpersonal safety.
Denominator	The number of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the following five HRSN (food insecurity, housing instability, transportation needs, utility difficulties and interpersonal safety) during their hospital inpatient stay.
Exclusions	The following patients would be excluded from the denominator: (1) Patients who opt out of screening. (2) Patients who are themselves unable to complete the screening during their inpatient stay and have no caregiver able to do so on the patient's behalf during their inpatient stay.

Click [here](#) to return to the Table of Contents

New Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Screen Positive Rate for Social Drivers of Health	
MBQIP Domain	Care Coordination
	(3) Patients who expire during the inpatient stay.
Measure Population (Determines the cases to abstract/submit)	The number of patients admitted for an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the following five HSRN (food insecurity, housing instability, transportation needs, utility difficulties and interpersonal safety) during their hospital inpatient stay.
Sample Size Requirements	No sampling – report on all information requested in denominator and numerator.
Calculations	The result of this measure would be calculated as <b>five separate rates</b> . Each rate is derived from the number of patients admitted for an inpatient hospital stay and who are 18 years or older on the date of admission, screened for an HRSN, and who screen positive for each of the five HRSNs— food insecurity, housing instability, transportation needs, utility difficulties, or interpersonal safety—divided by the total number of patients 18 years or older on the date of admission screened for all five HRSNs.
Data Source	Hospital tracking
Data Available On	The SDOH measures will be publicly reported in the October 2025 public reporting release.
Measure Submission and Reporting Channel	Annual numerator and denominator submission through Hospital Quality Reporting (HQR) platform via web-based data form.
Measure Resources	<a href="#">RQITA Website: Social Drivers of Health</a>

Existing Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Healthcare Personnel Influenza Immunization	
MBQIP Domain	Patient Safety
Encounter Period	October 1, 20XX – March 31, 20XX to align with flu season
Submission Deadline	May 15, 20XX ; Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable.
Measure Description	Influenza Vaccination Coverage among Healthcare Personnel
Measure Rationale	1 in 5 people in the U.S. get influenza each season. Combined in pneumonia, influenza is the 8th leading cause of death, with two-thirds of those attributed to patients hospitalized during the flu season.
Improvement Noted As	Increase in the rate (percent)
Numerator	All HCP personnel who: <ul style="list-style-type: none"> <li>• Received vaccination at the facility</li> <li>• Received vaccination outside of the facility</li> <li>• Did not receive vaccination due to a medical contraindication</li> <li>• Did not receive vaccination due to declination</li> <li>• Had an unknown vaccination status</li> </ul>
Denominator	All HCP that worked in the facility (part-time or full-time) for at least one day during the encounter period of October 1 – March 31.
Measure Population	All HCP that worked in the facility (part-time or full-time) for at least one day during the encounter period of October 1 – March 31.
Sample Size Requirements	No sampling - report all cases
Calculations	All data reporting is aggregate (whether monthly, once a season, or at a different interval)
Data Source	Administrative Data
Data Collection Approach	Hospital Tracking

Existing Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Healthcare Personnel Influenza Immunization	
MBQIP Domain	Patient Safety
Data Elements	<p>Three categories (all with separate denominators) of HCP working in the facility at least one day between 10/1-3/31:</p> <ul style="list-style-type: none"> <li>• Employees on payroll</li> <li>• Licensed independent practitioners</li> <li>• Students, trainees, and volunteers 18yo+</li> </ul> <p>A fourth optional category is available for reporting other contract personnel HCP workers who:</p> <ul style="list-style-type: none"> <li>• Received vaccination at the facility</li> <li>• Received vaccination outside of the facility</li> <li>• Did not receive vaccination due to medical contraindication</li> <li>• Did not receive vaccination due to declination</li> <li>• Had an unknown vaccination status</li> </ul>
Measure Submission and Reporting Channel	This data is reported annually through the Healthcare Personnel Safety Component of National Healthcare Safety Network (NHSN) website.
Data Available On	MBQIP Data Reports
Other Notes	Each facility in a system needs to be registered separately and HCPs should be counted in the sample population for every facility at which they work. Facilities must complete a monthly reporting plan for each year or data reporting period.
Measure Resources	<a href="#">RQITA Website: Vaccinations</a>

Existing Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Antibiotic Stewardship Implementation	
MBQIP Domain	Patient Safety
Encounter Period	Calendar Year (January 1, 20XX– December 31, 20XX)
Submission Deadline	March 1, 20XX ; Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable.
Measure Description	Centers for Disease Control and Prevention (CDC) National Healthcare Safety Network (NHSN) Annual Survey

Existing Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Antibiotic Stewardship Implementation	
MBQIP Domain	Patient Safety
Measure Rationale	<p>Improving antibiotic use in hospitals is imperative to improving patient outcomes, decreasing antibiotic resistance, and reducing healthcare costs. According to the Centers for Disease Control and Prevention (CDC), 20-50 percent of all antibiotics prescribed in U.S. acute care hospital are either unnecessary or inappropriate, which leads to serious side effects such as adverse drug reactions and Clostridium difficile infection. Overexposure to antibiotics also contributes to antibiotic resistance, making antibiotics less effective.</p> <p>In 2014, CDC released the “Core Elements of Hospital Antibiotic Stewardship Programs” that identifies key structural and functional aspects of effective programs and elements designed to be flexible enough to be feasible in hospitals of any size.</p>
Improvement Noted As	Increase in the number of core elements met
Measure Population	NA – This measure uses administrative data and not claims to determine the measure’s denominator population.
Sample Size Requirements	No sampling – report all information as requested
Data Collection Approach	Hospital tracking
Data Elements	<p>Questions as answered on the <a href="#">Patient Safety Component Annual Hospital Survey</a> inform whether the hospitals have successfully implemented the following core elements of antibiotic stewardship:</p> <ul style="list-style-type: none"> <li>• Leadership</li> <li>• Accountability</li> <li>• Drug Expertise</li> <li>• Action</li> <li>• Tracking</li> <li>• Reporting</li> <li>• Education</li> </ul>
Measure Submission and Reporting Channel	National Healthcare Safety Network (NHSN) website
Data Available On	MBQIP Data Reports
Measure Resources	<a href="#">RQITA Website: Antibiotic Stewardship</a>

## Existing Measure for MBQIP Reporting Within the Flex Program

### MBQIP 2025 Core Measure Set

#### Measure Name – Emergency Department Transfer Communication (EDTC)

MBQIP Domain	Emergency Department
Encounter Periods	Q1 (January 1 – March 31) Q2 (April 1 – June 30) Q3 (July 1 – September 30) Q4 (October 1- December 31)
Submission Deadlines	Q1 encounters (January 1 – March 31) DUE April 30 Q2 encounters (April 1 – June 30) DUE July 31 Q3 encounters (July 1 – September 30) DUE October 31 Q4 encounters (October 1- December 31) DUE January 31  Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable.
Measure Description	Percent of Patients who are transferred from an ED to another healthcare facility that have all necessary communication made available to the receiving facility in a timely manner.
Measure Rationale	Timely, accurate, and direct communication facilitates the handoff to the receiving facility, provides continuity of care and avoids medical errors and redundant tests.
Numerator	Number of patients discharged, transferred, or returned to another healthcare facility whose medical record documentation indicated that ALL 8 data elements were documented and communicated to the receiving hospital in a timely manner.
Denominator	ED patients who are discharged, transferred, or returned to another healthcare facility
Exclusions	<ul style="list-style-type: none"> <li>• AMA (left against medical advice)</li> <li>• Expired</li> <li>• Discharged to Home includes: Assisted Living Facilities, Board and care, foster or residential care, group or personal care homes, and homeless shelters</li> <li>• Discharged to Court/Law Enforcement – includes detention facilities, jails, and prison</li> <li>• Discharged Home with Home Health Services</li> <li>• Discharged to Outpatient Services including outpatient procedures at another hospital, Outpatient Chemical Dependency Programs, and Partial Hospitalization</li> <li>• Discharged to Hospice-at home</li> <li>• Not Documented/Unable to determine discharge location</li> <li>• Discharged to Observation Status</li> </ul>

## Existing Measure for MBQIP Reporting Within the Flex Program

### MBQIP 2025 Core Measure Set

#### Measure Name – Emergency Department Transfer Communication (EDTC)

MBQIP Domain	Emergency Department
Improvement Noted As	Increase in the rate
Measure Population (Determines the cases to abstract/submit)	Patients admitted to the emergency department who were then discharged, transferred, or returned to any type of acute care facility, or other care facility
Sample Size Requirements	Quarterly 0-44 - submit all cases > 45 - submit 45 cases Monthly 0-15 - submit all cases > 15 - submit 15 cases  The following measure specific sampling requirements exist: Hospitals need to submit a minimum of 45 cases per quarter from the required population. A hospital may choose to sample and submit more than 45 cases. Hospitals that choose to sample have the option of sampling quarterly or sampling monthly. Hospitals whose initial patient population size is less than the minimum number of 45 cases per quarter for the measure cannot sample and should submit all cases for the quarter
Calculations	This measure is calculated using an all or none approach. The overall EDTC Measure can be calculated as the percent of patients that met all the eight data elements divided by all transfers from ED to another healthcare facility.
Data Source	Manual Chart Abstraction Retrospective data sources for required data elements include administrative data and medical records.
Data Collection Approach	Chart Abstracted, composite of EDTC data elements 1-8, using an all or none approach
Data Elements	1. Home Medications 2. Allergies and/or Reactions 3. Medications Administered in ED 4. ED Provider Note 5. Mental Status/Orientation Assessment 6. Reason for Transfer and/or Plan of Care 7. Tests and/or Procedures Performed 8. Tests and/or Procedures Results
Measure Submission and Reporting Channel	Submission process directed by state Flex Program
Data Available On	MBQIP Data Reports

## Existing Measure for MBQIP Reporting Within the Flex Program

### MBQIP 2025 Core Measure Set

#### Measure Name – Emergency Department Transfer Communication (EDTC)

MBQIP Domain	Emergency Department
Measure Resources	Data specifications, data collection resources, and additional information: <a href="https://stratishealth.org/toolkit/emergency-department-transfer-communication/">https://stratishealth.org/toolkit/emergency-department-transfer-communication/</a>

## Existing Measure for MBQIP Reporting Within the Flex Program

### MBQIP 2025 Core Measure Set

#### Measure Name – OP-18 Median Time from ED Arrival to ED Departure for Discharged ED Patients

MBQIP Domain	Emergency Department
Encounter Periods	Q1 (January 1 – March 31) Q2 (April 1 – June 30) Q3 (July 1 – September 30) Q4 (October 1- December 31)
Submission Deadlines	Q1 encounters (January 1 – March 31) DUE August 1 Q2 encounters (April 1 – June 30) DUE November 1 Q3 encounters (July 1 – September 30) DUE February 1 Q4 encounters (October 1- December 31) DUE May 1  Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable.
Measure Description	Median time from emergency department arrival to time of departure from the emergency room for patients discharged from the emergency department.
Measure Rationale	Empirical evidence demonstrates that emergency department (ED) throughput is an indicator of hospital quality of care and shows that shorter lengths of stay in the ED lead to improved clinical outcomes. Significant ED overcrowding has numerous downstream effects, including prolonged patient waiting times, increased suffering for those who wait, rushed and unpleasant treatment environments, and potentially poor patient outcomes (Gardner, 2018). Quality improvement efforts aimed at reducing ED overcrowding and length of stay have been associated with an increase in ED patient volume, decrease in number of patients who leave without being seen, reduction in costs, and increase in patient satisfaction
Exclusions	Patients who expired in the emergency department
Improvement Noted As	Decrease in median value (time)

## Existing Measure for MBQIP Reporting Within the Flex Program

### MBQIP 2025 Core Measure Set

#### Measure Name – OP-18 Median Time from ED Arrival to ED Departure for Discharged ED Patients

MBQIP Domain	Emergency Department			
Measure Population (Determines the cases to abstract/submit)	Patients seen in a Hospital Emergency Department that have an E/M code in Appendix A, OP Table 1.0 of the CMS Hospital OQR Specifications Manual.			
Set Measure ID # and Measure Category Assignment	Measure ID# OP-18 has 4 Set Measure ID numbers:			
	OP-18 Set Measure ID#s	Performance Measure Name	Measure Category Assignment	OP-18 Algorithm Stratification Table**
	OP-18	Median Time from ED Arrival to ED Departure for Discharged ED Patients		
	• OP-18a	Median Time from ED Arrival to ED Departure for Discharged ED Patients – Overall Rate	Rate used to identify stratified populations of specific measures.	(D1) Overall Measure
	• OP-18b	Median Time from ED Arrival to ED Departure for Discharged ED Patients – Reporting Measure	The measure population for MBQIP reports.*	(D) Reporting Measure
	• OP-18c	Median Time from ED Arrival to ED Departure for Discharged ED Patients – Psychiatric/Mental Health Patients	In the measure population but only the Psychiatric/Mental Health Patients.	(D2) Psych/Mental Health Measure
	• OP-18d	Median Time from ED Arrival to ED Departure for Discharged ED Patients – Transfer Patients	In the measure population but only the Transfer Patients.	(D3) Transfer Measure

MBQIP 2025 Core Measure Set	
Measure Name – OP-18 Median Time from ED Arrival to ED Departure for Discharged ED Patients	
MBQIP Domain	Emergency Department
	<p>*For MBQIP abstracting purposes, the ED-Throughput Abstraction Tools automatically calculate the measure algorithm and measure categories for the abstractor.</p> <p>**The OP-18 Measure Algorithms and Stratification Tables can be found in the <a href="#">QualityNet CMS Hospital Outpatient Specifications Manuals</a></p>
Sample Size Requirements	<p>Quarterly 0-900 Submit 63 cases &gt; 900 - Submit 96 cases</p> <p>Monthly Note: Monthly sample size requirements for this measure are based on the quarterly patient population. 0-900 - submit 21 cases &gt; 900 - submit 32 cases</p>
Data Source	Hospital tracking
Data Collection Approach	Retrospective data sources for required data elements include administrative data and medical record documents. Some hospitals may prefer to gather data concurrently by identifying patients in the population of interest. This approach provides opportunities for improvement at the point of care/service. However, complete documentation includes the principal or other ICD-10-CM diagnosis and procedure codes, which require retrospective data entry.
Data Elements	Arrival Time Discharge Code E/M Code ED Departure Date ED Departure Time ICD-10-CM Principal Diagnosis Code Outpatient Encounter Date
Measure Submission and Reporting Channel	Hospital Quality Reporting (HQR) via Outpatient CART/Vendor
Data Available On	MBQIP Data Reports
Measure Resources	<ul style="list-style-type: none"> <li>• <a href="#">RQITA Website: ED Throughput</a></li> <li>• <a href="#">Hospital Quality Reporting/HARP site</a></li> </ul>

Existing Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – OP-22 Left Without Being Seen	
MBQIP Domain	Emergency Department
Encounter Periods	Encounter Period - Calendar Year (January 1 – December 31)
Submission Deadlines	May 15, 20XX ; Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable.
Measure Description	Percent of patients who leave the Emergency Department (ED) without being evaluated by a physician/advanced practice nurse/physician's assistant (physician/APN/PA).
Measure Rationale	Reducing patient wait time in the ED helps improve access to care, increase capability to provide treatment, reduce ambulance refusals/diversions, reduce rushed treatment environments, reduce delays in medication administration, and reduce patient suffering.
Numerator	The total number of patients who left without being evaluated by a physician/APN/PA
Denominator	The total number of patients who presented to the ED
Improvement Noted As	Decrease in rate (percent)
Sample Size Requirements	No sampling - report all cases
Data Collection Approach	Hospital Tracking
Measure Submission and Reporting Channel	Data will be completed through the Hospital Quality Reporting (HQR) system at <a href="https://hqr.cms.gov">https://hqr.cms.gov</a> via an online tool available to authorized users.
Data Available On	MBQIP Data Reports
Measure Resources	<ul style="list-style-type: none"> <li>• <a href="#">RQITA Website: ED Throughput</a></li> <li>• <a href="#">Hospital Quality Reporting/HARP site</a></li> </ul>

Existing Measure for MBQIP Reporting Within the Flex Program	
MBQIP 2025 Core Measure Set	
Measure Name – Hospital Consumer Assessment of Healthcare Providers & Systems (HCAHPS) – Composite 1: Communication with Nurses	
MBQIP Domain	Patient Experience
Encounter Periods	Q1 (January 1 – March 31) Q2 (April 1 – June 30) Q3 (July 1 – September 30) Q4 (October 1- December 31)
Submission Deadlines	Q1 encounters (January 1 – March 31) due first Wednesday in July Q2 encounters (April 1 – June 30) due first Wednesday in October Q3 encounters (July 1 – September 30) due first Wednesday in January Q4 encounters (October 1- December 31) due first Wednesday in April  Data submission deadlines on a federal holiday or weekend (Saturday or Sunday) will default to the first business day thereafter in this document where applicable. See <a href="#">MBQIP Data Submission Deadlines</a>
Measure Description	Percentage of patients surveyed who reported that their nurses “Always” communicated well.
Measure Rationale	Growing research shows positive associations between patient experience and health outcomes, adherence to recommended medication and treatments, preventive care, health care resource use and quality and safety of care.
Measure Population (Determines the cases to abstract/submit)	Patients discharged from the hospital following at least one overnight stay sometime between 48 hours and 6 weeks ago who are over the age of 18 and did not have a psychiatric principal diagnosis at discharge.
Sample Size Requirements	Sampling determined by HCAHPS vendor or self-administered if in compliance with program requirements. .
Data Collection Approach	Survey (typically conducted by a certified vendor)
Data Elements	Questions: <ul style="list-style-type: none"> <li>• During this hospital stay, how often did nurses treat you with courtesy and respect?</li> <li>• During this hospital stay, how often did nurses listen carefully to you?</li> <li>• During this hospital stay, how often did nurses explain things in a way you could understand?</li> </ul>
Measure Submission and Reporting Channel	Hospital Quality Reporting (HQR) via HCAHPS vendor or self-administered if in compliance with program requirements.
