

# Iowa Medicaid Provider Revalidation

## Frequently Asked Questions (updated June 2026)

### **What is changing in the new revalidation process?**

Iowa Medicaid is streamlining and modernizing the provider revalidation process to reduce administrative burden, improve data accuracy, and ensure compliance with federal guidelines. Changes include clearer instructions, more frequent data checks, and enhanced technology to support providers through each step.

### **How will Iowa Medicaid prioritize which providers revalidate first?**

Provider types will be assigned a priority level based on federal risk categories, enrollment age, and data completeness. High-risk provider types will be contacted earlier, while lower-risk providers will follow in later phases.

### **How long will providers have to complete revalidation once notified?**

Providers will receive a notice including defined timeframe—to submit all required revalidation materials. Deadlines will be clearly stated in each provider's notice.

### **What happens if a provider does not complete revalidation on time?**

If revalidation is not completed by the deadline, the provider's enrollment may be deactivated until all required information is submitted. Claims cannot be paid during periods of deactivation.

### **What information will providers need to submit during revalidation?**

Providers will be asked to confirm or update key data such as ownership information, licensure, accreditation status, service locations, and contact information. Some providers may need to complete additional screening steps depending on federal risk level.

---

### **Will providers need to submit documents they have already submitted before?**

Some documents may need to be resubmitted if they have expired, changed, or are incomplete in the system. Iowa Medicaid will notify providers when previously submitted documentation needs to be provided.

### **How is Iowa Medicaid ensuring the process is not overly burdensome for providers?**

The new strategic plan emphasizes minimizing provider workload through clearer communications, improved system functionality, simplified steps, and streamlined document requirements.

### **Are there resources available to help providers complete revalidation?**

Yes. Iowa Medicaid will offer step-by-step guidance, instruction sheets, help desk support, and training opportunities such as webinars and recorded demos. These resources are currently being created and will be shared before the first phase begins.

### **What improvements are being made to Iowa Medicaid's provider enrollment systems?**

The strategic plan includes enhancements to user interfaces, notification tools, document uploads, tracking features, and data validation to create a more seamless provider experience.

### **Will revalidation affect current claims processing?**

Claims will continue to be processed normally unless a provider misses a revalidation deadline. Providers who fail to comply will be temporarily deactivated from the system, causing claims to be denied until revalidated.

### **Does this revalidation process affect all Medicaid provider types?**

Yes. All enrolled providers must complete revalidation; however, timelines and requirements may vary based on provider type, risk category, and existing enrollment status.

**How often will revalidation occur going forward?**

Revalidation will follow the federally required cycle of 3 to 5 years but with enhanced ongoing monitoring to ensure provider data remains accurate between formal revalidation periods.

**How is Iowa Medicaid ensuring provider data remains secure?**

All revalidation activities occur within secure, state-approved systems, and data is managed according to state and federal privacy and security requirements, including HIPAA.

**What should providers do now to prepare?**

Providers should ensure their contact information is current, gather documents related to licensure and ownership, and monitor Iowa Medicaid communications for upcoming timelines.

**Where can providers direct questions about the revalidation process?**

A dedicated support channel has been created, along with online resources. All questions can be sent to [MedicaidProviderServicesRevalidation@hhs.iowa.gov](mailto:MedicaidProviderServicesRevalidation@hhs.iowa.gov)
