- ▶ All attendees are in “Listen Only” Mode
- ▶ Want to ask a question?
 - Type your question into the “Q&A” in the top area of your screen
 - Additional questions can be sent to IowaVFC@hhs.iowa.gov
- ▶ This webinar is being recorded. The recording and slides will be made available at <https://hhs.iowa.gov/health-prevention/vaccines-immunizations/vfc>.
- ▶ Questions regarding the VFA Program?
 - Email IowaVFA@hhs.iowa.gov.

Presentation Outline

- ▶ Programmatic Updates & Reminders
 - CDC Dear Provider Letter
 - Delivery Holds
 - Operations Guide & VFC Eligibility Reminders
 - MMRV Administration
- ▶ Respiratory Season Updates
- ▶ VFC Re-Enrollment & Demonstration
- ▶ Improving Vaccination Rates
- ▶ Tips & Tricks to Avoid Common VFC Program Noncompliance Issues
- ▶ Q&A—Ask Your Questions!

Programmatic Updates & Reminders

CDC Letter Regarding Shipment Verification

CDC recently sent a [**Dear Provider letter**](#) to enrolled VFC Providers regarding the CDC's direct ship delivery verification process.

As the letter states, cooperation from enrolled providers and their staff members is essential for ensuring program integrity as part of CDC's federal internal controls.

Please direct questions to [**IowaVFC@hhs.iowa.gov**](mailto:IowaVFC@hhs.iowa.gov).

U.S. CENTERS FOR DISEASE
CONTROL AND PREVENTION

1600 Clifton Road
Atlanta, GA 30329

June 23, 2026

Dear Provider,

Thank you for your continued participation in the Centers for Disease Control and Prevention (CDC) vaccine programs and for your commitment to protecting the health of the patients and communities you serve. Your organization is receiving this letter because it receives vaccines through a CDC vaccine program. Most of the vaccines distributed through CDC vaccine programs are shipped by CDC's centralized vaccine distributor, McKesson. However, certain vaccines are shipped directly from manufacturers to provider sites. These vaccines include varicella and MMR-varicella vaccines from Merck and COVID-19 vaccines from Pfizer.

For vaccines shipped directly to providers, CDC conducts an additional verification process to ensure deliveries are completed in accordance with CDC's vaccine contract. As part of this process, CDC contacts a random sample of provider sites that have recently received vaccines directly from the manufacturer. The purpose of this outreach, which typically occurs within a week of vaccine delivery, is to verify that the correct quantities and vaccine products ordered were successfully delivered to the provider site. CDC initially attempts to verify delivery status by telephone. If CDC is unable to reach the appropriate staff member after two telephone call attempts, CDC will follow up with an email. CDC summarizes and documents the results of these provider contacts in accordance with federal internal control standards (as outlined in OMB Circular A-123, [OMB Circular A-123 - Management's Responsibility for Internal Control | The White House](#)).

Your cooperation is essential. Please ensure your staff are informed of this verification process and that the verification calls are accepted and routed appropriately to the vaccine inventory manager or team for delivery verification.

Please contact your state, local, or territorial immunization program if you have questions about CDC's verification process.

Sincerely,

JEANNE M.

Upcoming Delivery Holds

- ▶ Deliveries made by UPS & FedEx
- ▶ Review and update delivery hours with each order
 - Required to have at least one four-hour consecutive period on a day other than a Monday to receive shipments
 - **Delivery hours do not update in IRIS unless included on a submitted order**
- ▶ Shipping hold for Labor Day holiday
- ▶ McKesson may place temporary holds due to severe weather conditions in Iowa or at the warehouse site

Updated Iowa VFC Operations Guide

Updated Iowa VFC Operations Guide with new Iowa HHS style and better alignment with federal VFC Operations Guide

Iowa Vaccines for Children
(VFC) Program Operations
Guide 2025-2026

April 2026 revision

Vaccines for Children Program Overview

Overview

The Vaccines for Children (VFC) Program is a federally funded program established by Congress in 1994 to increase access to vaccination for children who might not get vaccinated because of financial barriers. The VFC Program serves children through 18 years of age who meet at least one of the following criteria:

- ▶ American Indian or Alaska native (AI/AN)
- ▶ Medicaid-eligible
- ▶ Uninsured
- ▶ Underinsured

For full information on patient eligibility, see [Module 1—Patient Eligibility and Insurance Criteria](#).

The VFC Program is a unique component of the federal Medicaid Program. The Program is now in its fourth decade and has been recognized for its success in raising immunization coverage rates among high-risk children and reducing disparities in access to healthcare.

VFC Operations Guide and Resources

The VFC Program Operations Guide and other resources are intended for the management and operations of the VFC Program. The requirements and procedures are applicable to all providers enrolled in the VFC Program and receiving vaccines. VFC Program providers will be notified when new information is available or updates to the guide are made. Updated documents will be posted to the [Iowa VFC website](#).

The Iowa VFC Program provides programmatic and other time-sensitive information through an email listserv. Providers can join the VFC listserv and receive updates to their inbox. Contact the VFC Program at 800-831-6293 or email IowaVFC@hhs.iowa.gov to have an email address added.

VFC Program Fast Facts

- ▶ VFC Program benefits over 350,000 children in Iowa each year
- ▶ Approximately 600 enrolled health care provider sites in Iowa
- ▶ Nearly 650,000 doses of vaccine are distributed to Iowa providers annually

VFC Program Highlights

- ▶ Provides publicly purchased vaccine for eligible children at no cost to VFC-enrolled public and private healthcare providers
- ▶ Saves VFC-enrolled providers and patients out-of-pocket expenses for ACIP-recommended vaccines
- ▶ Eliminates or reduces vaccine cost as a barrier to vaccinating eligible children
- ▶ Reduces referrals of children from private providers to state and local health departments for vaccination

VFC Program History

- ▶ Congress created the VFC Program in response to the 1989-1991 measles outbreak in the United States, at a time when vaccination coverage was low. The measles epidemic resulted in tens of thousands of cases and hundreds of deaths.
- ▶ The VFC Program was established as a new entitlement program required to be part of each state's Medicaid plan. The VFC Program is a Title XIX Medicaid program.
- ▶ Section 1928 of the Social Security Act (42 U.S.C. §1396S) provides the legal authority for the VFC Program by requiring each state to establish a program for pediatric vaccine distribution to registered provider locations. It provides authority for purchase of vaccines for administration to eligible children using federal Medicaid and state funds (including 317).
- ▶ The VFC Program is available in all 50 states, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam and the Commonwealth of the Northern Mariana Islands.

VFC Program Funding

- ▶ Funding for the VFC Program is approved annually by the Office of Management and Budget (OMB).
- ▶ The funds are allocated through the Centers for Medicare and Medicaid Services (CMS) to CDC.
- ▶ CDC awards VFC Program funding through a cooperative agreement to 66 state, local and territorial immunization programs.

VFC Program Oversight

The VFC Program is administered at the national level by CDC through its National Center for Immunization and Respiratory Diseases (NCIRD). CDC is responsible for VFC Program policy development and national program oversight with Iowa HHS Immunization Program implementing the VFC Program in Iowa.

Medicaid

Title XIX of the Social Security Act is a federal/state entitlement program that pays for medical assistance for certain individuals and families with low incomes and limited resources. This program, known as Medicaid, became law in 1965 as a cooperative venture, jointly funded by the federal and state governments (including the District of Columbia and the territories) to assist states in furnishing medical assistance to eligible persons. Medicaid is the largest source of funding for medical and health-related services for America's low-income citizens.

Within broad national guidelines established by the federal government, each state Medicaid program can:

- ▶ Establish its own eligibility standards
- ▶ Determine the type, amount, duration and scope of services
- ▶ Set the rate of payment for services
- ▶ Administer its own program

As a result, Medicaid programs vary considerably from state to state.

Updated Quick View of VFC Eligibility and Insurance Coverage Situations

VFC Eligibility and Insurance Situations - Quick View

Available at:

<https://hhs.iowa.gov/health-prevention/vaccines-immunizations/vfc>

Quick View of VFC Eligibility and Insurance Coverage Situations

	Child's Insurance Status	VFC Eligibility Category	VFC	Private
Medicaid	Enrolled in Medicaid	Medicaid	✓	
	Primary insurance plan with Medicaid as secondary insurance	Medicaid ¹	✓	✓
	Enrolled in Medicaid and is American Indian/Alaska Native (AI/AN)	Medicaid or AI/AN	✓	
AI/AN	AI/AN	AI/AN	✓	
	AI/AN with no health insurance coverage	AI/AN or Uninsured ²	✓	
Un-insured	No health insurance coverage	Uninsured ²	✓	
	Enrolled in a Healthcare Sharing Ministry	Uninsured ²	✓	
Birthing Hospital	All insurance statuses	Birth Dose Hepatitis B is available for the whole birth cohort at enrolled facilities regardless of eligibility	✓	
Underinsured	Health insurance, but plan does not cover any vaccines	Underinsured ^{2,3,4}	✓	
	Insurance does not provide first-dollar coverage	Underinsured ^{2,3,4,5}	✓	
	Health insurance plan does not cover all ACIP-recommended vaccines	Underinsured ^{2,3,4}	✓	
	Health insurance plan covers all vaccines, but has a fixed dollar limit or cap on amount of coverage	Underinsured after fixed dollar limit is met ^{2,3,4}	✓	
		Insured until fixed dollar limit is met		✓
	Health insurance covers all vaccines but has not yet met plan's deductible (high-deductible plans)	Underinsured if the visit is for immunizations-only and deductible has not been met ^{2,3,4,5,6}	✓	
		Insured if visit is not for Immunizations-only, or deductible has been met		✓
Not VFC-Eligible	Enrolled in the Healthy and Well Kids in Iowa (Hawki) Program	Insured – Not VFC Eligible		✓
	Health insurance covers all vaccines	Insured – Not VFC Eligible		✓

Iowa Medicaid Immunization Provider Manual

- ▶ Defines immunization coverage and billing requirements for providers administering immunizations to Iowa Medicaid members.
- ▶ Includes coverage guidelines, Healthcare Common Procedure Coding System (HCPCS) Codes and Current Procedural Terminology (CPT) Codes

Available at:

<https://hhs.iowa.gov/media/18393>

Contact Iowa Medicaid Provider Services:

800-388-7909 | imeproviderservices@hhs.iowa.gov

Iowa Immunization Provider Manual

VFC Program Eligibility Reminders

- ▶ Beginning October 1, 2026, federal Medicaid and CHIP eligibility for non-citizens will be restricted. **However, these changes do not change the eligibility criteria for the VFC Program.**
- ▶ Non-U.S. citizen children are VFC eligible if they meet the basic VFC eligibility criteria (≤ 18 years and AI/AN, Medicaid-eligible, uninsured or underinsured).
 - Refugees, immigrants, foreign-exchange students and undocumented immigrants must be screened for VFC eligibility.
 - VFC vaccines are not intended to be used for children who are simply visiting or temporarily traveling in the U.S. or are tourists.

MMRV Administration Reminders

MMRV (Proquad) vaccine may be given to children 12 months through 12 years of age, usually:

- **First dose** at age 12 through 15 months
- **Second dose** at age 4 through 6 years

[MMRV \(Measles, Mumps, Rubella, and Varicella\) VIS](#)

Respiratory Season Updates

Respiratory Season Summary

COVID-19 Vaccine:

- Ordering starts in Fall
- Allocation model from CDC

Maternal RSV Vaccine:

- Request for vaccine started in July; can use unexpired vaccine from previous seasons
- Administration starts September 1, ends January 31
- Allocation model from CDC, must request doses from VFC Program

Influenza Vaccine:

- Distribution starts in August
- Allocation model from CDC

RSV monoclonal antibody products (Nirsevimab, Clesrovimab)

- Ordering to start in August; can use unexpired vaccine from previous seasons
- Administration starts October 1, ends March 31
- Allocation model from CDC

Return Expired VFC Vaccines

VFC Program providers are expected to return **all spoiled and expired VFC vaccines**, including influenza and COVID-19 vaccines, as soon as possible within the first 30 days but not to exceed six months after expiration date

- Return single dose syringes, unopened single dose vials and unopened multi-dose vials to McKesson
- Products in open boxes can be returned, however opened multi-dose vials cannot be returned
- Shipping label is only valid for 30 days

[Nonviable Vaccine Return Instructions](#)

VFC Re-Enrollment

VFC Program Re-Enrollment Due by July 22, 2026

Each VFC Program provider is **required** to re-enroll in the VFC Program on an annual basis, which will occur July 8-22, 2026

Part 1: Training:

Primary and back-up vaccine coordinators are required to complete two of CDC's *You Call the Shots* modules:

- [Vaccine Storage and Handling - Jan 2026](#)
- [Vaccines for Children \(VFC\) - Jan 2026](#)

Part 2: Update IRIS Contacts & Complete Re-enrollment page:

- ▶ Under “Edit Organization,” review the generated VFC Patient Activity chart
- ▶ Review and update the organization's contacts, including address and email, and providers practicing at the facility
- ▶ Last step is to complete the VFC Re-enrollment form

VFC Program Re-Enrollment Due by July 22, 2026, con't

- ▶ Re-enrollment occurs in IRIS
 - Iowa VFC Program does not accept any paper forms
 - Do not fax or email forms to the Iowa VFC Program
- ▶ Only IRIS Admin users have access to complete VFC re-enrollment:
 - To add additional Admin Users, complete the [IRIS Site Enrollment Form](#) and send to IRISProgram@hhs.iowa.gov
- ▶ Failure to complete the re-enrollment process by July 22 will result in suspension and the inability to place VFC vaccine orders in IRIS

Action: Complete Re-enrollment by July 22, 2026

Ensure Key Staff Have IRIS Admin Access

Recommendation:

- ▶ Primary & Back-up vaccine coordinators recommended to have IRIS Admin Access to complete VFC related activities

Action Step:

- ▶ Verify IRIS Admin Access
- ▶ Complete [IRIS Authorized Site Agreement – Organization](#) if primary or back-up coordinators do not have IRIS Admin Access

Key Staff Training

Requirement:

Primary & Back-up vaccine coordinators required to complete two *You Call the Shots* modules.

- [Vaccines for Children \(VFC\)](#)
- [Vaccine Storage and Handling](#)

Action Steps:

Ensure Primary & Back-up vaccine coordinators complete trainings.

- Other clinic staff are encouraged to complete the trainings but not required.

- [Diphtheria, Tetanus, and Pertussis \(DTaP\)](#) Mar 2024
- [Haemophilus influenzae type b \(Hib\)](#) Jul 2023
- [Hepatitis A](#) May 2023
- [Hepatitis B](#) Feb 2024
- [Human Papillomavirus](#) Jan 2024
- [Influenza](#) Sept 2023
- [Meningococcal](#) Jun 2024
- [MMR](#) Jan 2023
- [Pneumococcal](#) Jun 2024
- [Polio](#) Sept 2023
- [Rotavirus](#) Mar 2024
- [Tetanus, Diphtheria, and Pertussis \(Tdap\)](#) Apr 2024
- [Understanding the Basics: General Best Practices for Immunization](#) Apr 2025
- [Vaccine Administration](#) Feb 2026
- [Vaccines For Children \(VFC\)](#) Jan 2026
- [Vaccine Storage and Handling](#) Jan 2026
- [Varicella](#) Oct 2024
- [Zoster](#) Aug 2024

<https://cdc.gov/immunization-training/hcp/you-call-the-shots/>

***VFC Program requirement**

Updated Key Staff Contacts

Requirement: All changes in key staff must be communicated to Iowa Immunization Program

- ▶ IRIS Admin users can update Edit Organization Page
 - Primary, back-up, and vaccine delivery contacts

Action Steps:

Review contacts in IRIS “Edit Organization” page

VFC Program Re-Enrollment

1. Primary and back-up vaccine coordinators are required to complete two of CDC's "***You Call the Shots***" modules:
 - **Vaccine Storage and Handling - Jan 2026**
 - **Vaccines for Children (VFC) - Jan 2026**
2. IRIS: <https://iris.iowa.gov/>

Clinic Status Changes Must Be Reported

Clinic Status Reporting Requirement:

- ▶ VFC Program providers must communicate clinic status changes to the Iowa VFC Program, including, but not limited to:
 - Permanent closures
 - Temporary closures
 - Moving locations
 - Anything that would affect delivery, storage or monitoring of VFC vaccine

Action Steps:

Email iowaVFC@hhs.iowa.gov before clinic changes occur.

Improving Vaccination Rates

You Call the Shots Modules

- ▶ Vaccines for Children (VFC)
- ▶ Vaccine Storage and Handling

Vaccinate Your Family Launches Minicourse, “Measles: What Everyone Needs to Know”

- ▶ Vaccinate Your Family (VYF) launched a free minicourse, [Measles: What Everyone Needs to Know](#).
- ▶ In this course, you will learn about measles (e.g., how it is spread, who is most at risk) and how the vaccine protects children, teens and adults. It also covers addressing common myths and how to have supportive conversations about measles prevention.
- ▶ Visit [VYF University](#) to see the minicourses, each of which is free and self-paced.

Note: *This is not a VFC Program requirement.*

Tips & Tricks to Avoid Common VFC Program Noncompliance Issues

2025-26 Fiscal Year Summary

- ▶ Ended year with 594 enrolled VFC providers
- ▶ Completed 357 provider visits
 - 315 compliance site visits
 - 30 unannounced S&H visits
 - 12 new enrollment site visits

Complete the Annual Re-Enrollment!

Action Step:

Complete your annual VFC Program re-enrollment today!

VIS & VAERS

Requirement:

VFC Program providers should have readily available, up-to-date VISs for vaccines covered by VICP and relevant to the populations served.

Note: Providers should not delay use of an ACIP-recommended vaccine because a VIS is unavailable. For any ACIP-recommended product that does not have a VIS or Immunization Information Statement available, a provider may use the package insert, written FAQs or any other document to inform patients about the benefits and risks of the vaccine. Once a VIS is available, providers should use it.

[CDC Current VISs](#)

[Immunize.org Laminated QR Code Tables](#)

General Reminders & Resources

Receiving VFC Vaccine Shipments Checklist

Receiving VFC Vaccine Shipments Checklist

Document to ensure appropriate receipt of VFC Program vaccine shipments

Recommended, not required use.

Available at:

<https://hhs.iowa.gov/health-prevention/vaccines-immunizations/vfc>

Receiving VFC Vaccine Shipments Checklist

Instructions

Complete this checklist to ensure appropriate receipt of Vaccines for Children (VFC) Program vaccines. If any shipment issues are identified, store vaccines at appropriate temperatures, mark them as "Do Not Use" and notify the Iowa VFC Program at IowaVFC@hhs.iowa.gov. **Never refuse a vaccine shipment.**

Facility Name:	VFC PIN:	VFC Coordinator Email:
Date McKesson Shipment(s) Received:	Date Merck Shipment(s) Received (Proquad & Varivax):	Date Pfizer Shipment(s) Received (COVID):

- Inspect shipment and select any issues with the delivery:

☐ Previously opened	☐ Not ordered or incorrect recipient
☐ Broken, torn, or tampered with	☐ Package never arrived
- Open package immediately to identify any out-of-range temperatures

Refrigerated vaccines ship with a TagAlert temperature monitor.

- Follow directions on the device:
 - Remove TagAlert temperature monitor from the box. The TagAlert is located inside the inner box, next to vaccine.
 - Follow instructions on the blue card to stop the TagAlert and determine if appropriate temperature was maintained in transit.
 - Immediately place vaccine in appropriate storage unit upon receipt.
- Note if alarm was triggered, store vaccine at appropriate temperature and mark as "Do Not Use" until further guidance is received.

Frozen varicella-containing vaccines are packaged with an insert to identify allowable shipping time.

- Note if shipment arrived beyond allowed time.

COVID-19 vaccines may have differences in cold-chain management or shipping

- Moderna (Spikevax) ships from McKesson frozen at -50 to -15°C (-58 to 5°F) with instructions for confirming proper shipping temperatures.
- Novavax ships from McKesson at 2 to 8°C (36 to 46°F) with MonitorMark/FREEZEmarker indicators.
 - Pfizer COVID-19 vaccine shipment and storage varies by product. Follow package inserts included with the shipment to confirm appropriate temperature and storage.

Vaccine Deliveries: TagAlert Temperature Monitors in Refrigerated Coolers

- ▶ New temperature monitors (TagAlert) in shipments from McKesson
- ▶ **TagAlert temperature monitors should be discarded** and do not need to be returned to McKesson
- ▶ Each shipment includes a flyer with unpacking steps, TagAlert instructions and cooler return instructions to assist staff responsible for receiving vaccine shipments

Action item: Upon opening the box, providers should **immediately** press the blue “**Stop & Start**” button until the “Stop” icon appears. Then, read the indicator status to determine if the appropriate temperature was maintained during transit.

Handling Vaccines Compromised During Shipment

Handling of Vaccine Compromised During Shipment

If a provider believes a vaccine shipment was comprised, they must immediately contact the Iowa VFC Program at 800-831-6293 or iowaVFC@hhs.iowa.gov.

Important: Do not dispose of the shipment until guidance has been received.

On the same day as the shipment, VFC Providers **must** also contact:

- ▶ McKesson Centralized Distribution: Contact centralized distribution immediately at 877-TEMP123 (877-836-7123). This must be done the same day vaccines arrive. Reporting later may result in the Iowa VFC Program being responsible for the spoiled vaccine regardless of the reason for the excursion.
- ▶ Direct Ship Vaccines (Merck or Pfizer frozen vaccines): Contact the Iowa VFC Program for guidance. Merck issues may also be reported directly to the manufacturer using their [CDC/VFC Vaccine Inquiry Form](#).

Ordering Replacement DDLs

- ▶ Immunization Program has Log Tag 400s available to VFC Program providers at no cost
- ▶ Send email request to IowaVFC@hhs.iowa.gov containing:
 - VFC PIN
 - Number of refrigerator DDLs requested
 - Number of freezer DDLs requested
 - If a docking station is needed
- ▶ Remember to check and set appropriate parameters and alarms

2026 VFC Program Webinar Series

► Wednesday, November 18, at 12 p.m.:

<https://events.gcc.teams.microsoft.com/event/b0c0ddd4-e947-4a66-b520-761a9cd48237@8d2c7b4d-085a-4617-8536-38a76d19b0da>

Webinars are recorded and can be found on the Iowa VFC Program website: <https://hhs.iowa.gov/immunization/vfc>

IRIS Webinars - 2026

IRIS Webinar Schedule – 2026

The following schedule provides dates, times, details and registration links for the monthly IRIS webinars. Topics will include documentation of vaccine doses administered, IRIS inventory management, mass vaccination, reminder recall, vaccine transfers, documentation of vaccine wastage, patient search tips, how to unlock user accounts and how to reset user passwords.

Registration is required for each session via Teams. Please contact the IRIS Help Desk at 800-374-3958 with any questions.

Tuesday, August 11, noon to 1 p.m.	Meeting ID: 215 576 615 804 70, Passcode: cN3ya7Fp Register for the August 11 webinar
Tuesday, September 8, noon to 1 p.m.	Meeting ID: 295 369 255 820 79, Passcode: et9SP3R8 Register for the September 8 webinar

- ▶ Registration is required for each session (via Teams)
- ▶ [**2026 IRIS Webinar Schedule**](#)
- ▶ Contact the IRIS Help Desk at 800-374-3958 with any questions

Topics include:

- IRIS inventory management
- Mass vaccination
- Reminder recall
- Vaccine transfers
- Document doses administered
- Documentation of vaccine wastage
- Patient search tips
- How to unlock user accounts and reset user passwords
