

BAC Considerations

MAC Meeting – 9/10/26

Janae Carter, Medicaid Rules Officer

Health and
Human Services

Health Information Exchange

What does BAC want to see?

What does BAC want?

- To view each Provider's registration status with Iowa Medicaid
- Ability to sort providers by provider type
- To select what information is disclosed in medical records requests/transfers, and to have the records sent via an app or portal
- To view status of claims: submitted, paid, or outstanding

Barriers Identified

- Whether current Iowa Medicaid IT infrastructure could support a health information exchange
- Establishing a method for members, beneficiaries and providers to consent to sharing, and a method to retain files of consent
- How feasible is it, and what would be the timeline?
