

Perinatal Hepatitis B Hospital Report Form

For Women Known to be HBsAg POSITIVE: Administer hepatitis B immune globulin (HBIG) AND hepatitis B vaccine to infant in separate limbs within 12 hours of birth.

For Women Whose HBsAg Status is UNKNOWN: Perform stat HBsAg screening. While tests are pending, administer hepatitis B vaccine to infant within 12 hours of birth. If the mother's test is positive, the infant should receive HBIG as soon as possible and before the infant is discharged. HBIG must be given within 7 days of birth.

Please complete and FAX to: Shelly Jensen RN BSN Perinatal Hepatitis B Coordinator
