

Iowa School Immunization Audit Data: 2021-2022

Valid Immunization Certificates

during the 2021-2022 School Year:

94.3% had a Certificate of Immunization
(fully vaccinated by law)

2.3% had a Religious Exemption

0.3% had a Medical Exemption

1.9% had a Provisional Certificate

29,650 of students were under or un-immunized.

516,311

Number of Valid Immunization Certificates

98.8%

Valid Immunization Certificates

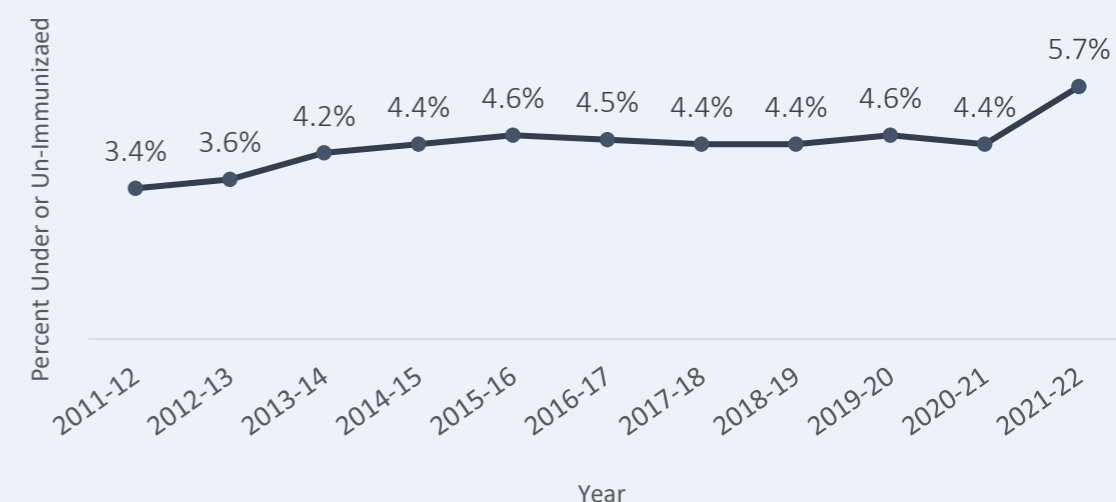

522,476

Total Students Enrolled

Changes Over Time: Under or Un-Immunized Students

Percent of under or un-immunized students increased 1.3% from last year and has steadily been increasing since 2011.

It important to continue efforts in maintaining high vaccination rates in order to prevent the spread of vaccine-preventable diseases.

Iowa Child Care Immunization Audit Data: 2021-2022

Valid Immunization Certificates

during 2021-2022:

93.3% had a Certificate of Immunization
(fully vaccinated by law)

1.7% had a Religious Exemption

0.1% had a Medical Exemption

1.4% had a Provisional Certificate

6,045 of children in licensed child care were under or un-immunized.

87,126

Number of Valid Immunization Certificates

96.4%

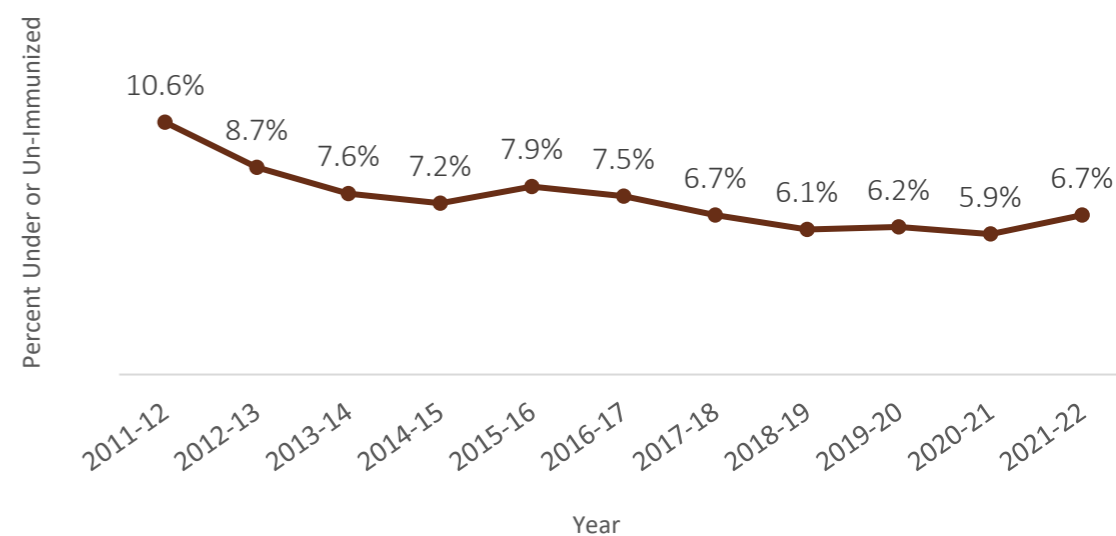

Valid Immunization Certificates

90,345

Total Enrolled

Changes Over Time: Under or Un-Immunized Children

Although the percent of under or un-immunized children in licensed child care has steadily decreased over the last 10 years, there was a 0.8% increase from last year. These changes are most likely caused by the COVID-19 pandemic.

Data Note: Under or un-immunized refers to individuals with a Provisional Certificate of Immunization, Certificate of Immunization Exemption, or an invalid or no certificate. Data as of 5/2/2022.
