

# Iowa Behavioral Risk Factor Surveillance System (BRFSS)

Iowa Department of Public Health

2020 Survey Snapshot

## Healthcare Access

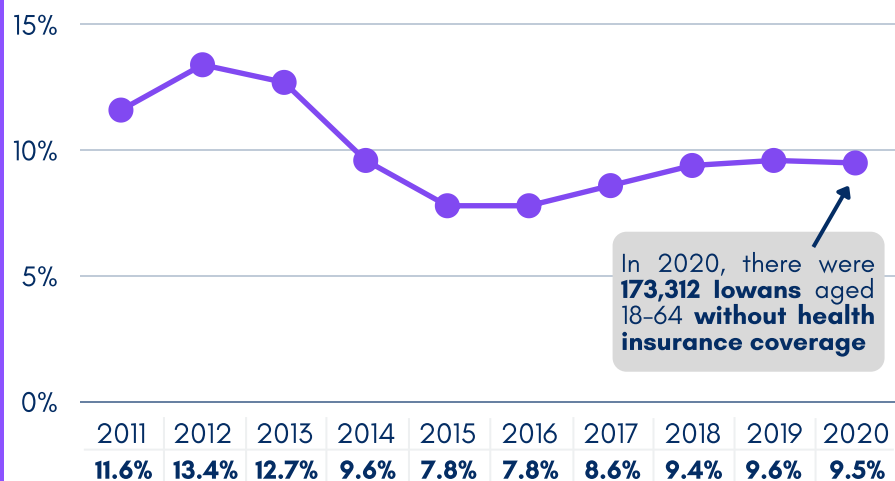

Published June 2022

### Among Iowans in 2020...

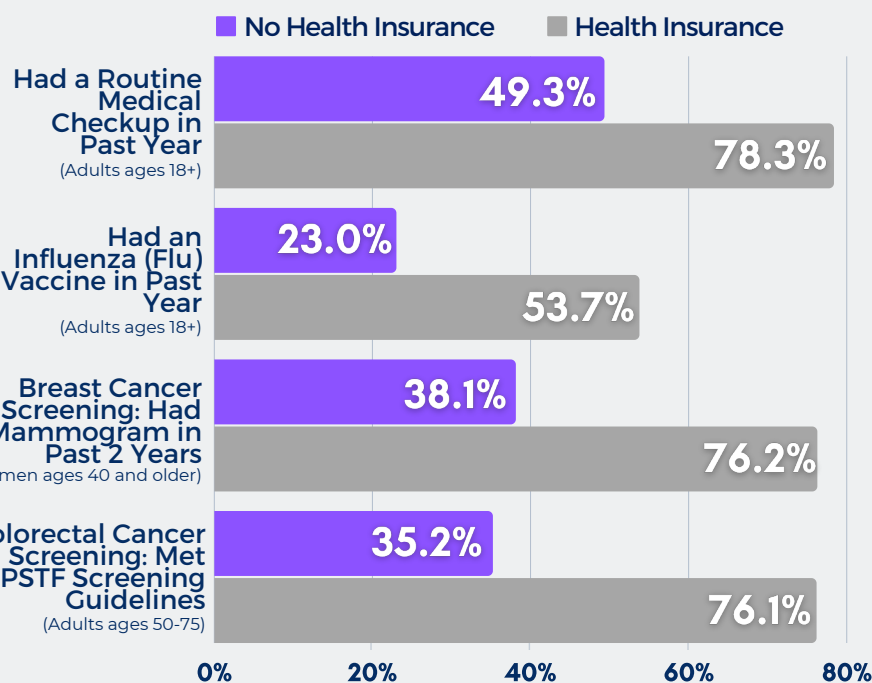

**1 in 10** adults aged 18-64 said that they did not have any kind of health insurance coverage

Iowans Aged 18-64 with No Health Insurance Coverage, by Year, 2011-2020

In 2020, there were **173,312 Iowans** aged 18-64 without health insurance coverage

### Rates for Using Clinical Preventive Services were Lower Among Iowans with No Health Insurance:

### Among all adult Iowans (18+)...

**23.9%** reported they did not have a routine medical checkup within the past year

**18.0%** reported they did not have anyone they thought of as their personal health care provider

**7.3%** reported they couldn't see a doctor in the past year when they needed to because of cost

The BRFSS is an annual, state-based telephone survey that collects data on chronic health conditions, health-related risk behaviors, use of clinical preventive practices, and health care access. BRFSS data are used to measure population health over time, design public health programming and policies, inform strategies to improve the health of Iowans, and track progress towards public health goals.
