

1st Five

Levels of Engagement One-Pager

Definition of an Engaged Practice - A primary care practice or primary care provider is considered engaged when the Site Coordinator considers historical involvement or participation with the practice *AND* the practice meets one of the following:

- a) at least one primary care provider in the practice has referred in the last 12 months
- b) an active signed Letter of Commitment is on file with the 1st Five Agency*

**active is defined as "actively engaging in the terms of the partnership as described in the 1st Five Letter of Commitment"*

Table One.

Level of Engagement	Level 1 Practice New / Re-Engaged	Level 2 Practice Beginning	Level 3 Practice Fully Implementing
Defining Characteristics	<ul style="list-style-type: none"> • They have no knowledge or very limited knowledge of 1st Five • They have not received training or education from 1st Five on developmental surveillance or screening tools • They have never referred to 1st Five <hr/> <ul style="list-style-type: none"> • May have historical knowledge of 1st Five (some, limited, or extensive), but the most recent 1st Five training/education has not been completed in the past 12 months • May have previously received education or training from 1st Five on developmental surveillance or screening tools, but the most recent training/education has not been completed in the past 12 months • May have a signed 1st Five Letter of Commitment completed at some point, but not within the past 12 months • May have previously referred to 1st Five at some point, but the most recent referral from this practice has not been received in the last 12 months 	<ul style="list-style-type: none"> • Considered an engaged practice (see definition) • Has received education or training from 1st Five on developmental surveillance or screening tools in the past 12 months • Screening is NOT implemented in well-child visits at the recommended intervals of 9, 18, 30 months of age • NOT currently referring to 1st Five for needs identified by outcomes of standardized developmental screening and developmental concerns identified by the parent/caregiver 	<ul style="list-style-type: none"> • Considered an engaged practice (see definition) • Screening is implemented in well-child visits at the recommended intervals of 9, 18, and 30 months • Currently referring to 1st Five for needs identified by outcomes of standardized developmental screening and developmental concerns identified by the parent/caregiver <ul style="list-style-type: none"> ➢ Referrals are for children from birth to five years old ➢ Referrals include indication that a screening was completed on the 1st Five Referral Form

If one or more primary care providers in a practice meets the Level of Engagement criteria, that practice should be supported and engaged using strategies for engagement defined by that level.

Table Two.

Outlier Practices	Partially Implementing Practices (PIP)
Defining Characteristics	<p>This practice is considered engaged (see definition)</p> <ul style="list-style-type: none"> • Currently referring, but are not screening at 9, 18, 30 month intervals as recommended <ul style="list-style-type: none"> ➢ Currently referring, screening inconsistently (screening to refer to 1st Five) • Currently screening (at recommended intervals), but are not referring to 1st Five <ul style="list-style-type: none"> ➢ Directly referring to resources ➢ Using internal clinic staff to route referrals ➢ Not referring for developmental needs
